## WARNING
### RISK OF ELECTRIC SHOCK
### DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING:**
This equipment must be grounded.
To ensure safe operation, the three-pin plug must be inserted only into a standard three-pin power outlet which is effectively grounded through normal household wiring. Extension cords used with the equipment must have three cores and be correctly wired to provide connection to the ground. Wrongly wired extension cords are a major cause of fatalities. The fact that the equipment operates satisfactorily does not imply that the power outlet is grounded or that the installation is completely safe. For your safety, if you are in any doubt about the effective grounding of the power outlet, please consult a qualified electrician.

**WARNING:**
• To reduce the risk of fire or electric shock, do not expose this equipment to rain or moisture.
• To reduce the risk of fire or electric shock hazard, keep this equipment away from all liquids. Use and store only in locations which are not exposed to the risk of dripping or splashing liquids, and do not place any liquid containers on top of the equipment.

**WARNING:**
Always keep the stand screws and protective panel mounting screws out of the reach of infants and small children.

**CAUTION:**
The mains plug of the power supply cord shall remain readily operable.
The AC receptacle (mains socket outlet) shall be installed near the equipment and shall be easily accessible. To completely disconnect this equipment from the AC mains, disconnect the power cable plug from the AC receptacle.

**CAUTION:**
In order to maintain adequate ventilation, do not install or place this unit in a bookcase, built-in cabinet or any other confined space. To prevent risk of electric shock or fire hazard due to overheating, ensure that curtains and any other materials do not obstruct the ventilation.

**CAUTION:**
To reduce the risk of fire or electric shock and annoying interference, use the recommended accessories only.

**CAUTION:**
This apparatus can be operated at a voltage in the range of 100 - 240 V AC. Voltages other than 120 V are not intended for U.S.A. and Canada.

**CAUTION:**
Do not use DC power supply whose capacity exceeds 240VA.

**CAUTION:**
Excessive sound pressure from earphones and headphones can cause hearing loss.

**CAUTION:**
Check the installation at least once a year.
An improper installation could cause the monitor to fall off resulting in personal injury.

☐ indicates safety information.

**Notice (U.S.A. only):**
Disposal may be regulated in your community due to Environmental considerations. For disposal or recycling information, please visit Panasonic website: http://www.panasonic.com/environmental or call 1-888-769-0149.

## WARNING (USA and Canada)

• Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75.
## FCC NOTICE (USA)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

### CAUTION:

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

### Warning:

To assure continued FCC emission limit compliance, the user must use only shielded interface cables when connecting to external units. Also, any unauthorized changes or modifications to this equipment could void the user's authority to operate it.

indicates safety information.

**WARNING:**
This equipment must be earthed.
To ensure safe operation, the three-pin plug must be inserted only into a standard three-pin power point which is effectively earthed through normal household wiring. Extension cords used with the equipment must have three cores and be correctly wired to provide connection to the earth. Wrongly wired extension cords are a major cause of fatalities. The fact that the equipment operates satisfactorily does not imply that the power point is earthed or that the installation is completely safe. For your safety, if you are in any doubt about the effective earthing of the power point, please consult a qualified electrician.

**WARNING:**
• To reduce the risk of fire or electric shock, do not expose this equipment to rain or moisture.
• To reduce the risk of fire or electric shock hazard, keep this equipment away from all liquids. Use and store only in locations which are not exposed to the risk of dripping or splashing liquids, and do not place any liquid containers on top of the equipment.

**WARNING:**
Always keep the stand screws and protective panel mounting screws out of the reach of infants and small children.

**CAUTION:**
Do not remove panel covers by unscrewing them.
To reduce the risk of electric shock, do not remove covers.
No user serviceable parts inside.
Refer servicing to qualified service personnel.

**CAUTION:**
The mains plug of the power supply cord shall remain readily operable.
The AC receptacle (mains socket outlet) shall be installed near the equipment and shall be easily accessible. To completely disconnect this equipment from the AC mains, disconnect the power cable plug from the AC receptacle.

**CAUTION:**
To reduce the risk of fire or electric shock and annoying interference, use the recommended accessories only.

**CAUTION:**
In order to maintain adequate ventilation, do not install or place this unit in a bookcase, built-in cabinet or any other confined space. To prevent risk of electric shock or fire hazard due to overheating, ensure that curtains and any other materials do not obstruct the ventilation.

**CAUTION:**
Do not use DC power supply whose capacity exceeds 240VA.

**CAUTION:**
Excessive sound pressure from earphones and headphones can cause hearing loss.

**CAUTION:**
Check the installation at least once a year.
An improper installation could cause the monitor to fall off resulting in personal injury.

indicates safety information.

**EEE Yönetmeliğine Uygundur.**
**EEE Complies with Directive of Turkey.**

**[ India Only ]**

For the purpose of recycling to facilitate effective utilization of resources, please return this product to a nearby authorized collection center, registered dismantler or recycler, or Panasonic service center when disposing of this product.
Please see the Panasonic website for further information on collection centers, etc.

# Caution for AC Mains Lead

**FOR YOUR SAFETY PLEASE READ THE FOLLOWING TEXT CAREFULLY.**

This product is equipped with 2 types of AC mains cable. One is for continental Europe, etc. and the other one is only for U.K.
Appropriate mains cable must be used in each local area, since the other type of mains cable is not suitable.

**FOR CONTINENTAL EUROPE, ETC.**
Not to be used in the U.K.
**FOR U.K. ONLY**

**FOR U.K. ONLY**

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.
A 13 amp fuse is fitted in this plug.
Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 13 amps and that it is approved by ASTA or BSI to BS1362.
Check for the ASTA mark ⬦ or the BSI mark ♡ on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local Panasonic Dealer.

**How to replace the fuse**
1. Open the fuse compartment with a screwdriver.
2. Replace the fuse.

Fuse

indicates safety information.

---

**Note regarding the Power Management function specified under COMMISSION REGULATION (EC) No 1275/2008 implementing Directive 2009/125/EC of the European Parliament and of the Council.**

This device is designed and manufactured for use at a broadcasting station and/or in a similar environment.
This device is not equipped with a Power Management function or the Power Management function is set to OFF as it will prevent the device from fulfilling its intended purpose for the reasons below.

1. If the device is a Studio Camera, a Weather Camera, a Mixer or other processor:
   A Power Management function may cause the device to suddenly stop during recording or while On Air.
2. If the device is a Studio Monitor:
   A Power Management function may cause video for the confirmation of whether a signal is normal, or whether the signal has been lost, to be un-viewable.
3. If the device is a Camera Recorder:
   A professional camera recorder must be able to start quickly at any time, but a Power Management function will cause an increase in the time taken to resume from Stand-by mode.

---

Manufactured by: Panasonic Corporation, Osaka, Japan

Declaration of Conformity
with the requirements of Technical Regulation on the Restriction Of the use of certain Hazardous Substances in Electrical and Electronic Equipment
(adopted by Order №1057 of Cabinet of Ministers of Ukraine)

The Product is in conformity with the requirements of Technical Regulation on the Restriction Of the use of certain Hazardous Substances in electrical and electronic equipment (TR on RoHS).

The content of hazardous substance with the exemption of the applications listed in the Annex №2 of TR on RoHS:
1. Lead (Pb) – not over 0,1 % or 1000wt ppm;
2. Cadmium (Cd) – not over 0,01 % or 100wt ppm;
3. Mercury (Hg) – not over 0,1 % or 1000wt ppm;
4. Hexavalent chromium (Cr6+) – not over 0,1 % or 1000wt ppm;
5. Polybrominated biphenyls (PBBs) – not over 0,1 % or 1000wt ppm;
6. Polybrominated diphenyl ethers (PBDEs) – not over 0,1 % or 1000wt ppm.

Декларація про Відповідність
Вимогам Технічного Регламенту Обмеження Використання деяких Небезпечних Речовин в електричному та електронному обладнанні
(затвердженого Постановою №1057 Кабінету Міністрів України)

Виріб відповідає вимогам Технічного Регламенту Обмеження Використання деяких Небезпечних Речовин в електричному та електронному обладнанні (ТР ОВНР).

Вміст небезпечних речовин у випадках, не обумовлених в Додатку №2 ТР ОВНР, :
1. свинець(Pb) – не перевищує 0,1 % ваги речовини або в концентрації до 1000 частин на мільйон;
2. кадмій (Cd)– не перевищує 0,01 % ваги речовини або в концентрації до 100 частин на мільйон;
3. ртуть(Hg) – не перевищує 0,1 % ваги речовини або в концентрації до 1000 частин на мільйон;
4. шестивалентний хром (Cr6+ ) – не перевищує 0,1 % ваги речовини або в концентрації до 1000 частин на мільйон;
5. полібромбіфеноли (PBB) – не перевищує 0,1% ваги речовини або в концентрації до 1000 частин на мільйон;
6. полібромдефенілові ефіри (PBDE) – не перевищує 0,1 % ваги речовини або в концентрації до 1000 частин на мільйон.

Декларация о Соответствии
Требованиям Технического Регламента об Ограничении Использования некоторых Вредных Веществ в электрическом и электронном оборудовании
(утверждённого Постановлением №1057 Кабинета Министров Украины)

Изделие соответствует требованиям Технического Регламента об Ограничении Использования некоторых Вредных Веществ в электрическом и электронном оборудовании (ТР ОИВВ).

Содержание вредных веществ в случаях, не предусмотренных Дополнением №2 ТР ОИВВ:
1. свинец (Pb) – не превышает 0,1 % веса вещества или в концентрации до 1000 миллионных частей;
2. кадмий (Cd) – не превышает 0,01 % веса вещества или в концентрации до 100 миллионных частей;
3. ртуть (Hg) – не превышает 0,1 % веса вещества или в концентрации до 1000 миллионных частей;
4. шестивалентный хром (Cr6+)– не превышает 0,1 % веса вещества или в концентрации до 1000 миллионных частей;
5. полибромбифенолы (PBB) – не превышает 0,1 % веса вещества или в концентрации до 1000 миллионных частей;
6. полибромдифеноловые эфиры (PBDE) – не превышает 0,1 % веса вещества или в концентрации до 1000 миллионных частей.

# Accessories and Options

■ **Accessories**

Power cable x 1 (BT-4LH310P)
Power cable x 2 (BT-4LH310E)
Stand (already attached to the unit) x 1
Stand mounting screws (already attached to the unit) x 4
Protective panel mounting screws (M3, 8 mm (5/16″) long) x 4
• Use these screws for the permanent attachment of a protective panel designed for the unit. (→page 11)
• Tightening torque: Tighten to about 30 N·cm or less
CD-ROM x 1

**<Note>**
• After unpacking the product, dispose of the AC cord cap(BT-4LH310E) and packaging material in an appropriate manner.
• Store the small parts in an appropriate location that is out of the reach of infants and small children.

# About These Operating Instructions

• These operating instructions refer to BT-4LH310P/BT-4LH310E as "this unit."
• The illustrations, explanatory drawings, and other figures included in these operating instructions are for illustrative purposes only and may differ from the actual appearance.
• HDMI, HDMI logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and/or other countries.
• VESA and DisplayPort are trademarks or registered trademarks of the Video Electronics Standards Association.
• Adobe® Reader® is a trademark of Adobe Systems Incorporated.
• Page references are indicated as (→ page 00) in these operating instructions.

# Transportation precautions

Do not try to lift the monitor by grabbing the LCD panel.
Transport the monitor standing upright and secure it so that it cannot fall over to prevent damaging it.
Do not expose the LCD panel to strong pressure or pressure from pointed objects. Take care especially during transportation. Exposing the LCD panel to strong pressure may result in blurring or other damage.

# Table of Contents

# Precautions for Use

- The LCD monitor is manufactured with high-precision technology and has an effective pixel count of 99.99 % or more. However, less than 0.01 % of pixels may be stuck or dead. This is not a malfunction and does not affect recorded images.

- If a still image is displayed for an extended period of time, it may generate a temporary afterimage (phosphor burn-in). (However, afterimages can be removed by displaying normal video for a while.)

- LCD response speed and brightness vary depending on the ambient temperature.

- Do not install the unit where it will be exposed to direct sunlight. The cabinet may deteriorate and the LCD screen may be damaged.

- Do not install the unit in locations where enough space cannot be provided around it as heat may build up inside, preventing normal operation. Be sure to provide at least 80 mm (3-1/8″) of space from the rear of the unit.

- Exposing the LCD screen to intense light sources will impair its characteristics and lower image quality.

- In an environment exposed to drastic temperature fluctuations, condensation may build up on and inside the LCD screen. This may lower the quality of the screen and cause a malfunction.

- There may be some unevenness on the screen depending on the image displayed.

- Leaving the unit in a location exposed to high temperature and humidity for an extended period of time may impair the characteristics of the LCD screen and cause unevenness.

- Streaks of light may be seen in the area between the edge of the screen and the frame but this is normal and not a malfunction.

- Protective material is attached to the front to protect the LCD panel from damage during removal from the packing box and transportation. Remove it before use.

- This unit does not support VIERA Link. If the unit is connected to a VIERA-Link-compatible device with an HDMI cable, the VIERA Link functions of the other device may not operate properly.

- If the unit is used near a wireless transmitter, high-voltage equipment, speaker, large motor, or other device or exposed to static electricity, the audio and video may be distorted by electromagnetic waves.

- Do not install the unit in a location that is 2 000 m (6561′ 1/8″) or more above sea level.
  Doing so may affect the lifespan of the parts and result in a malfunction.

- Do not install the unit outdoors.
  Use the unit indoors.

- For the DisplayPort cables, use DisplayPort cables that comply with the DisplayPort standard.
  Using a cable that does not comply with the DisplayPort standard may result in incorrect operation such as video being interrupted or not being displayed.

- For the HDMI cables, use HDMI High Speed cables that comply with the HDMI standard.
  Using a cable that does not comply with the HDMI standard may result in incorrect operation such as video being interrupted or not being displayed.

# Outline

The unit is an LCD monitor for industrial applications, equipped with a 78.9 cm (31.1″) (effective display area) LCD.

■ **High-performance LCD panel**
- The unit incorporates a full 4K (4096 x 2160) LCD panel.
- It offers excellent color reproduction, a wide viewing angle, and a fast response time.

■ **High resolution and high image quality technology**
- The implementation of 10-bit for all signal circuit processing as well as 3D look up table (LUT) image processing facilitates accurate and smooth gradation from low to high brightness levels.
- Support for digital cinema DCI (P3)*1 in addition to color space (SMPTE-C/EBU/ITU-709) allows you to also use the unit for cinema production applications.
- Gamma compensation is performed for each monitor.
- *1 u' v' coverage: 96 %

■ **Wide variety of functions and interfaces**
- The unit is equipped with four 3G/HD-SDI lines, two HDMI lines, and two DisplayPort lines.
- FOCUS-IN-RED function
  Focusing the camera is extremely easy because the area of the image in focus is displayed in red or another color to make it easy to see what is in focus.
- LUT upload function
  Color conversion data generated by a color grading device or other device can be imported to the unit to enable the reproduction of the colors intended by your colorist.
- 4-screen display function (3G/HD-SDI inputs and same format)
  - The panel display area can be split into four to display four input signals independently.
  - The time code and audio level meter superimposed on each input signal can be displayed independently.
  - Camera adjustments can be simplified by simultaneously displaying FOCUS-IN-RED, WFM, and vectorscope based on one input signal. (MULTI FUNCTION)
  - One input signal can be displayed on four screens and you can independently change the gamma, color temperature, and color gamut or adjust the image quality on three of the screens. This function facilitates easy comparison with the original image to check the differences created by effects. (PICTURE ASSIST)
- Audio level meter display function
  This function allows you to display the level of an audio signal embedded in a 3G/HD-SDI, HDMI, or DisplayPort signal. Furthermore, support is also included for reference point setting, peak hold, and overrange display.
  The unit is equipped with a speaker and HEADPHONES output jack so you can check the audio. There is also a menu for selecting channels.
- Cross hatch display function
  This function displays markers at regular vertical and horizontal intervals to facilitate easy composition.
- External remote control
  The unit is equipped with RS-485, RS-232C, and GPI remote control connectors. A daisy chain connection using the RS-485 input/output connectors enables the control of multiple monitors (up to 32 monitors).
- A robust metal frame has been employed to ensure the durability required for transportation.
- Support for DC driving means you can also operate the unit on batteries.

## Video Monitor

**Front**

**Rear**

**Front Panel**
**(→page 12)**
**Connector Section**
**(Right Side Panel)**
**(→page 13)**

**Connecting the**
**Power Cable**
**(→page 14)**

**1** **Tally lamps (red and green)**
The red tally and green tally can be lit by a control signal from GPI.
When both the red tally and green tally light at the same time, the tally color will be amber.
The red tally can be made to light when the REC status information is superimposed on the SDI signal. (→SDI REC TALLY on page 32)

**2** **Protective panel mounting screw holes (4 holes)**
Four screw holes have been provided to enable attachment of a permanent protective panel.
Be sure to use the supplied protective panel mounting screws (M3, 8 mm long).
**<Note>**
Protective material is attached at the time of shipment to protect the LCD panel from damage during removal from the packing box and transportation. Remove it before using the unit.

## Front Panel

**1** **POWER <⏻/l> switch**

Switches the power on/off. When the power is turned on, the green lamp lights.

To turn the power off, press and hold the switch for at least three seconds.

**2** **INPUT SELECT buttons**

Selects the signal input line. The green lamp above the pressed button indicates the selected input line.

| | |
|---|---|
| SDI: | Serial digital interface input (3G/HD compatible) |
| DisplayPort DUAL: | DisplayPort input (HDCP compatible) |
| DisplayPort SINGLE: | DisplayPort input (HDCP compatible) |
| HDMI DUAL: | HDMI input (HDCP compatible) |
| HDMI SINGLE: | HDMI input (HDCP compatible) |

• When the power is turned on, the input line becomes the one selected when the power was last turned off.

• When the FORMAT setting is set to AUTO, both the DUAL and SINGLE LED indicators are lit when DisplayPort or HDMI input is detected.
When it is set to 2K/HD/PC, the selection becomes SDI/ DisplayPort SINGLE/HDMI SINGLE.

• When the control lock is on, the 🗝 mark is displayed on the screen and the input line cannot be changed. (→page 48)

• When INT-SG (internal chart for adjustment [Color Bar + Grayscale]) is selected, all the lamps above the <INPUT SELECT> buttons are off. Use the [INPUT SELECT] menu to select INT-SG. (→page 20)

**3** **FUNCTION buttons**

FUNCTION1 to Function5:

Press a FUNCTION button to execute the function selected for that button in the menu.

• When the control lock is on, the 🗝 mark is displayed on the screen and the FUNCTION operation is disabled. (→page 48)

**4** **MENU button, rotary knob (with PICTURE push-on switch), and RETURN/VOLUME button (→page 16)**

Use these to display menus, select and adjust settings, and execute items selected in a menu.

| | |
|---|---|
| MENU: | Displays [TOP MENU] ([MAIN MENU] (main menu), [FUNCTION] menu, or [INPUT SE-LECT] menu). Also press this to exit a menu. |
| Rotary knob: | Turn the knob clockwise or counterclockwise to move the cursor up or down or change a setting value. Press the knob to start changing or confirm a setting value or display a submenu. |
| RETURN: | Press this button to display the previous menu or return the setting being set to the original value. |

When no menu is displayed, pressing the rotary knob <PIC-TURE> or <RETURN/VOLUME> button displays a menu other than the [TOP MENU].

| | |
|---|---|
| PICTURE: | When no menu is displayed, pressing the rotary knob displays the [PICTURE] (picture adjustment) menu. (→page 17) |
| VOLUME: | When no menu is displayed, pressing the <RETURN/VOLUME> button displays the audio volume bar meter. (→page 17) |

**5** **Speaker (monaural)*1**

This allows you to check the audio.

• Audio is not output while headphones are connected to the HEADPHONES output connector.

**6** **HEADPHONES output connector (M3 stereo mini jack)*1**

Headphones can be connected to check the audio.

• The volume and sound quality differ depending on the headphones.

*1 For an 4K signal (SDI [QUAD], DisplayPort [DUAL], or HDMI [DUAL]), you can check the audio of the input signal set in the 4K INPUT SELECT item of the AUDIO menu for the corresponding connector.

**<Note>**

The brightness of the front LEDs can be changed in the [LED BRIGHT] setting (→page 33). However, the brightness will always be in HIGH mode immediately after startup.

## Connector Section (Right Side Panel)

- When this unit is used to connect multiple monitors in a daisy-chain*1, the screen may become distorted or noise may occur depending on factors such as the quality of the original signal, cable length, and number of connected devices.

    *1 **Daisy-chain:**
    This is a method to connect one signal to multiple devices in sequence by connecting the through-out of a signal connected to an input connector of a device to a second connector of this unit or to an input connector of a second device, and connecting that through-out to a third connector of this unit or an input connector of a third device, and so on.
- Use a 5CFB or equivalent cable to connect to an SDI connector.

**2 DisplayPort connectors**
① DisplayPort1 signal input connector
Use a double shielded cable to connect to a DisplayPort connector.
② DisplayPort2 signal input connector
Use a double shielded cable to connect to a DisplayPort connector.

**3 HDMI connectors**
① HDMI1 signal input connector
Use a double shielded cable to connect to an HDMI connector.
② HDMI2 signal input connector
Use a double shielded cable to connect to an HDMI connector.

**1 SDI connectors**
① SDI1 (3G/HD) input connector (BNC)
This is an SDI input connector. (It is compatible with 3G-SDI and 3G/HD automatic switching.)
② SDI2 (3G/HD) input connector (BNC)
This is an SDI input connector. (It is compatible with 3G-SDI and 3G/HD automatic switching.)
③ SDI3 (3G/HD) input connector (BNC)
This is an SDI input connector. (It is compatible with 3G-SDI and 3G/HD automatic switching.)
④ SDI4 (3G/HD) input connector (BNC)
This is an SDI input connector. (It is compatible with 3G-SDI and 3G/HD automatic switching.)
⑤ SDI1 active through output connector (BNC)
This connector outputs SDI1 input as is.
• The SD-SDI signal is not displayed but it is output.
⑥ SDI2 active through output connector (BNC)
This connector outputs SDI2 input as is.
• The SD-SDI signal is not displayed but it is output.
⑦ SDI3 active through output connector (BNC)
This connector outputs SDI3 input as is.
• The SD-SDI signal is not displayed but it is output.
⑧ SDI4 active through output connector (BNC)
This connector outputs SDI4 input as is.
• The SD-SDI signal is not displayed but it is output.

**4 RS-232C input connector (D-SUB, 9-pin)**
External control is possible with an RS-232C signal.
• Use a shielded cable to connect to the RS-232C input connector.

**5 GPI input connector (D-SUB, 9-pin)**
External control is possible with a GPI signal.
• Use a shielded cable to connect to the GPI input connector.

**6 RS-485 input/output connectors (RJ-45)**
External control is possible with an RS-485 signal.
• Use a shielded cable to connect to an RS-485 input/output connector.
• Make sure that the cable plug is fully inserted in the connector and cannot easily be pulled out.
• A daisy chain connection using the RS-485 input/output connectors enables the control of multiple monitors (up to 32 monitors).
• Connect a terminator (120 Ω) between the first and second pin of the RS-485 OUT terminal on the last monitor in the chain.

# Power supply

## Connecting the Power Cable

**1. Connect the power cable to the unit.**
 • Attach the hook to the plug to prevent it from becoming disconnected in the event of the power cord being pulled.

Hook
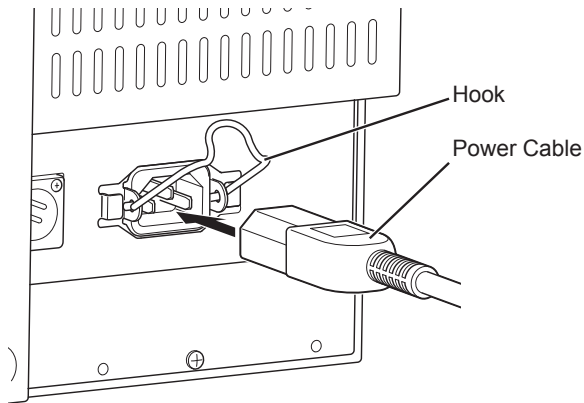

Power Cable

**2. Connect the power cable to the power outlet.**

■ **When using an external DC power supply (28 VDC)**
   Insert the plug all the way in to prevent it from becoming disconnected in the event of the DC cord being pulled.

**<Note>**
Use a shielded DC cord that is shorter than 2 m (6′ 7″). Using a DC cord that is 2 m (6′ 7″) or longer may cause noise to be generated on the screen.

When using an external DC power supply, be sure to check the external DC power supply ratings and use one that is suitable for the unit.
Check the pin assignment of the DC output connector of the external DC power supply and the DC IN connector on the unit, and connect the connectors with the correct polarity.
Accidentally connecting a +28 V power supply to the GND connector may cause a fire or injury.

| Pin number | Signal |
|---|---|
| 1 | GND |
| 2 | – |
| 3 | – |
| 4 | +28 V |
External DC input connector

# Detaching and Attaching the Stand

The stand is detachable.
• When detaching and attaching the stand, it is recommended that you place the unit flat on the edge of a desk or table with a soft cloth or similar material spread underneath.
• The stand is specifically designed for this monitor and cannot be used with other monitors.

## Detaching the Stand
Stand mounting screws

**Remove the stand mounting screws (four) using a Phillips screwdriver.**
• Store the detached stand and stand mounting screws in a safe place for future use.

## Attaching the Stand
1. **Align the holes in the stand with those in the monitor.**

2. **Use a Phillips screwdriver to secure the stand to the unit with the stand mounting screws (four).**
   • Install the mounting screws in the order (① to ④) shown in the figure.
   • When attaching the stand, tighten the stand mounting screws to a tightening torque from 80 N·cm to 120 N·cm.

# On-screen Display

The screen shows the operating status display, main menu (MAIN MENU) / FUNCTION menu / INPUT SELECT menu display, picture adjustment (PICTURE) menu display, audio volume display, FUNCTION display, audio level meter display, time code (TC) display, closed caption (CC) display, and other information.

## Operating Status Display

**\<Note\>**
- The status display state can be set in [STATUS DISPLAY] of the [SYSTEM CONFIG] menu. (→page 32)
- Icons meeting the 3 to 8 display conditions are displayed aligned to the left.
- [UNSUPPORT SIGNAL] and [NO SIGNAL] may not be displayed properly.

**1. Selected input line (→ page 12, 20)**
- Displays [SDI1], [SDI2], [SDI3], [SDI4], [DisplayPort1], [DisplayPort2], [HDMI1], [HDMI2], [INT-SG], etc.

**2. Signal format indication**
- If [UNSUPPORT SIGNAL] is displayed, an unsupported signal is being input.
  It may also indicate that the format of the input signal differs from that set in the [INPUT SELECT] menu.
- When [NO SIGNAL] is displayed, a signal is not being input.

**3. Various indications (CRCC error information)**
- Displayed when a CRCC error occurred during SDI input.

**4. Various indications (payload ID information)**
- Displayed when there was an error with the payload ID during SDI input.
- [NOID] is displayed if there is no payload ID and [ID] is displayed if the signal format and payload ID do not match.

**5. Various indications (screen selection information)**
- Displayed when normal mode and PICTURE ASSIST mode of SDI QUAD mode.
- Displayed in the status display section of the area selected in the screen in DISPLAY SELECT.

**6. Various indications (PIXEL TO PIXEL mode)**
- Displayed when image display is PIXEL TO PIXEL.

**7. Various indications (ZOOM mode)**
- Displayed when using the ZOOM function and also includes the ZOOM target position.

**8. Various indications (FILM mode)**
- Displayed when [GAMMA SELECT] in the [VIDEO CONFIG] menu is set to [FILM].

**9. Various indications (lock setting)**
- Displayed when front panel operation is locked. (→page 48)

**10. Various indications (audio mute indication)**
- Displayed when the speaker and headphones are muted. (→page 21)

**11. Various indications (picture adjustment change indication)**
- Indicates that picture adjustments ([PEAKING]/[PHASE]/[CHROMA]/[BRIGHT]/[CONTRAST]/[BACKLIGHT]) have been changed from the values confirmed in [SETUP LOAD] or [POWER ON SETUP]. (→page 21)

**12. Various indications (FRAME GRAB function)**
- Displayed when the FRAME GRAB function is operating and a still image is displayed. (→page 43)

**13. Various indications (quantization range to apply to input signal)**
- Displayed when [RANGE] in the [SYSTEM CONFIG] menu is set to [FULL] or [LIMITED]. (→page 31)

## Main Menu (MAIN MENU)/FUNCTION Menu/INPUT SELECT Menu Display

**1. Press \<MENU\> when no menu is displayed.**
- [TOP MENU] appears.

## On-screen Display (Continued)

**2. Turn the rotary knob <PICTURE> to select a menu ([MAIN MENU], [FUNCTION], or [INPUT SELECT]) and press the rotary knob <PICTURE>.**

- For details on how to operate menus, refer to "On-screen Menu Operations" (→ page 20).

[MAIN MENU]

```
MAIN MENU
  MARKER
  VIDEO CONFIG
  MEASURE SETUP
  SYSTEM CONFIG
  FUNCTION
  AUDIO
  DISPLAY SETUP
  CONTROL
  INFORMATION
MENU EXIT  ((●)) SEL.  RETURN RETURN
```

[FUNCTION]

```
FUNCTION
  F1:                    ZOOM MODE
  F2:                    Y MAP
  F3:                    FRAME GRAB
  F4:                    ZEBRA
  F5:                    SDI DISPLAY MODE
  SETUP                  USER1
    ZOOM MODE OFF
MENU EXIT  ((●)) SEL.  ●↓ ENTER  RETURN RETURN
```

[INPUT SELECT]

```
INPUT SELECT
  SDI
  DisplayPort
  HDMI
  INT-SG
MENU EXIT  RETURN RETURN
```
Instructions on <MENU> button operations are displayed.

**3. To close a menu, press <MENU>.**

- The menu display disappears after approximately 2 minutes of inactivity. (The value shown before the display disappears is confirmed as the setting value.)

### Picture Adjustment (PICTURE) Menu Display

```
PICTURE
SETTING [FACTORY]──────────────── A
  PEAKING        0
  PHASE          30
  CHROMA         30         B
  BRIGHT         30
  CONTRAST       60
  BACKLIGHT      80
  FOCUS-IN-RED   15
MENU EXIT  ((●)) SEL.  ●↓ ENTER  RETURN RETURN
```
**A:** The file name called by [SETUP LOAD] or [POWER ON SETUP] is displayed for [SETTING].

**B:** When the picture adjustment values ([PEAKING]/ [PHASE]/[CHROMA]/[BRIGHT]/[CONTRAST]/[BACK-LIGHT]) are changed from the factory defaults, the position pointers are displayed in white.

**1. Press the rotary knob <PICTURE> when no menu is displayed.**

- The [PICTURE] (picture adjustment) menu appears.
- For details on how to operate menus, refer to "Picture Adjustment (PICTURE) Menu" (→page 21).

**2. To close a menu, press <MENU>.**

- This display disappears after approximately 10 seconds of inactivity. (The value shown before the display disappears is confirmed as the setting value.)

### Audio Volume Display

```
VOLUME        0
```

**1. Press <RETURN/VOLUME> when no menu is displayed.**

- The audio volume bar meter appears.
- For details on how to operate the audio volume, refer to "On-screen Menu Operations" (→ page 20).

**2. To close a menu, press <MENU>.**

- This display disappears after approximately 10 seconds of inactivity. (The value shown before the display disappears is confirmed as the setting value.)

### FUNCTION Display

```
USER1
  F1 : ZOOM MODE
  F2 : Y MAP
  F3 : FRAME GRAB
  F4 : FOCUS-IN-RED
  F5 : MARKER
       ZOOM MODE OFF ──── A
```
- The display settings can be set from the [FUNCTION] menu.
- When [FUNCTION DISPLAY] (→page 38) is set to [ON1] or [ON2], press any of the <FUNCTION1> to <FUNCTION5> buttons to display the status of the item set for FUNCTION.
- If no operation is performed for approximately 2 seconds, the set value is confirmed and the display disappears.
- "A" indicates the operating status. (→"Operation items displayed on the screen during FUNCTION button operation" on page 39)
- The items assigned to F1 to F5 can be changed in [SETUP] (→page 38).

# On-screen Display (Continued)

## Audio Level Meter Display

● SINGLE screen

Channel display

Reference point    Peak hold

0 dB point

Overrange
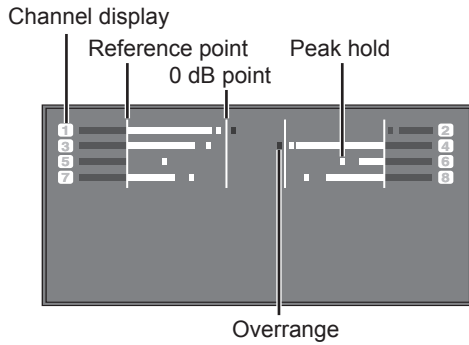

● QUAD screen

• When SDI, HDMI, and DisplayPort signals are input, a color bar meter indicates the audio level.
• The display method of the audio level meter can be set in the menu. (→page 47)
• In QUAD screen mode, an audio level meter is displayed for each of SDI1, SDI2, SDI3, and SDI4.

**Display color**
Green: Up to reference point (included)
Yellow: Reference point (not included) to 0 dB point (not included)
Red:    Overrange
## Time Code (TC) Display

● SINGLE screen

LTC 01:02:10:02 ——— (:) NDF
(.) DF

LUB 01 02 10 02

LTC 01:02:10:02
LUB AB CD EF 01

● QUAD screen

LTC 01:02:10:02    LTC 01:02:10:02

LTC 01:02:10:02    LTC 01:02:10:02
• The display settings can be set in the menu. Also, the display mode ([LTC], [VTC], [LUB], [VUB], [LTC+LUB], or [VTC+VUB]) can be selected in the menu. (→page 47)
• In QUAD screen mode, the TC is displayed for each of SDI1, SDI2, SDI3, and SDI4.

**<Note>**
"VITC" is indicated as "VTC" on this unit.

**In LTC and VTC display mode**
• Displays the time code in the order of hour : minute : second : frame.
• In drop-frame mode, a different delimiter is used between the second and frame indications.

**<Note>**
Read errors are displayed as "--:--:--:--."

**In LUB and VUB display modes:**
• Displays the time code in the order of BG8, BG7, BG6, BG5, BG4, BG3, BG2, and BG1.
  BG: Binary group
• The colon (:) delimiter is not displayed.

**<Note>**
Read errors are displayed as "-- -- -- --."

**In LTC+LUB and VTC+VUB display modes:**
Each combination is displayed separately.

## Closed Caption (CC) Display
● SINGLE screen

```
Closed
caption
display
area
```
(When the specified window extends beyond the
entire 1/8 screen)

- When an SDI signal is input, closed captions can be displayed.
- Closed captions comply with the following standards.
  HD-SDI CC Standard   EIA/CEA-608 (708),
                                   EIA/CEA-708, OP-47
- The EIA/CEA-708 Standard allows the simultaneous display of closed captions at a specified location on up to eight windows.
- The display position is in a display area that is further inside than the 1/8 screen.
  (Refer to **<Note>** below.)
- The display settings can be set in the menu. Also, the display service (EIA/CEA-708) of the closed captions can be selected in the menu. (→page 47)

**<Note>**
- The position of the window specified by the closed caption information is in the display area.
- The window may extend beyond the display area depending on the position and size of the specified window. Such a window will be displayed but a window that extends beyond the 1/8 screen will be repositioned so that it is displayed inside the 1/8 screen.

# On-screen Menu Operations

## Main Menu (MAIN MENU)

- For details on how to open the main menu, refer to "Main Menu (MAIN MENU)/FUNCTION Menu/INPUT SELECT Menu Display" (→ page 16).

**1.** **Turn the rotary knob <PICTURE> to select a menu item and press the rotary knob <PICTURE>.**
- The submenu appears.

```
MAIN MENU
  MARKER
  VIDEO CONFIG
  MEASURE SETUP
  SYSTEM CONFIG
  FUNCTION
  AUDIO
  DISPLAY SETUP
  CONTROL
  INFORMATION
  MENU EXIT  (( )) SEL.  RETURN RETURN
```
**2.** **Turn the rotary knob <PICTURE> to select a submenu item and press the rotary knob <PICTURE>.**
- The setting values in the submenu can be changed.

```
MARKER                        OFF
  ASPECT1                     OFF
  ASPECT1 RATIO               17:9
  ASPECT1 MODE(17:9)          17:9
  ASPECT1 MODE(16:9)          16:9
  AREA1                       OFF
  ASPECT2                     OFF
  ASPECT2 RATIO               17:9
  ASPECT2 MODE(17:9)          17:9
  ASPECT2 MODE(16:9)          16:9
  AREA2                       OFF
  BACK                        NORMAL

  ASPECT1 MODE(16:9)          16:9
  AREA1                       OFF
  ASPECT2                     OFF
  ASPECT2 RATIO               17:9
  ASPECT2 MODE(17:9)          17:9
  ASPECT2 MODE(16:9)          16:9
  AREA2                       OFF
  BACK                        NORMAL
  CENTER                      OFF
  CROSS                       OFF
  COLOR ITEM                  ASPECT1 AREA1
  COLOR                       WHITE
  CROSS HATCH                 OFF
  SIZE                        MIDDLE
  MENU EXIT  (( )) SEL.  ( ) ENTER  RETURN RETURN
```

**4.** **To return to the previous screen, press <RETURN/VOLUME>.**

## FUNCTION Menu

- For details on how to open the [FUNCTION] menu, refer to "Main Menu (MAIN MENU)/FUNCTION Menu/INPUT SELECT Menu Display" (→ page 16).

**1.** **Turn the rotary knob <PICTURE> to select a function item.**
- The setting status of the selected function item is indicated by green.

```
FUNCTION
  F1:              ZOOM MODE
  F2:              Y MAP
  F3:              FRAME GRAB
  F4:              ZEBRA
  F5:              SDI DISPLAY MODE
  SETUP            USER1
  ZOOM MODE OFF
  MENU EXIT  (( )) SEL.  ( ) ENTER  RETURN RETURN
```
**2.** **Press the rotary knob <PICTURE>.**
- Each press of the rotary knob <PICTURE> changes the setting and performs the function.

```
FUNCTION
  F1:              ZOOM MODE
  F2:              Y MAP
  F3:              FRAME GRAB
  F4:              ZEBRA
  F5:              SDI DISPLAY MODE
  SETUP            USER1
  ZOOM MODE OFF
  MENU EXIT  (( )) SEL.  ( ) ENTER  RETURN RETURN
```
- The settings are the same as in the [FUNCTION] menu (→page 37) of MAIN MENU.

**3.** **To return to the [TOP MENU] screen, press <RETURN/VOLUME>.**

## INPUT SELECT Menu

- For details on how to open the [INPUT SELECT] menu, refer to "Main Menu (MAIN MENU)/FUNCTION Menu/INPUT SELECT Menu Display" (→ page 16).

**1.** **Turn the rotary knob <PICTURE> to select an input signal connector or [INT-SG] and press the rotary knob <PICTURE>.**

```
INPUT SELECT
  SDI
  DisplayPort
  HDMI
  INT-SG
  MENU EXIT  RETURN RETURN
```
SDI:          Serial digital interface input
DisplayPort:  DisplayPort input
HDMI:         HDMI input
INT-SG:       Internal chart for adjustment (color bar + grayscale) (→page 71)

**2.** **To return to the [TOP MENU] screen, press <RETURN/VOLUME>.**

## Picture Adjustment (PICTURE) Menu

**1. Turn the rotary knob <PICTURE> to select a menu item and press the rotary knob <PICTURE>.**
   - The setting value of the selected menu item can be changed.

```
PICTURE
SETTING [FACTORY]
PEAKING          0
PHASE           50
CHROMA          50
BRIGHT          50
CONTRAST        50
BACKLIGHT      100
FOCUS-IN-RED    15

MENU EXIT  (◉) SEL.  ◉↓ ENTER
```
| Name | Function | Adjustable range ( ): denotes the factory default. |
|------|----------|---------------------------------------------------|
| **PEAKING** | PEAKING | 0 to 60 (0) |
| **PHASE** | PHASE | 0 to 100 (50) |
| **CHROMA** | CHROMA | 0 to 100 (50) |
| **BRIGHT** | BRIGHT | 0 to 100 (50) |
| **CONTRAST** | CONTRAST | 0 to 100 (50) |
| **BACKLIGHT** | BACKLIGHT | 0 to 200 (100) |
| **FOCUS-IN-RED** | FOCUS-IN-RED | 1 to 30 (15) |

The position pointer color is green only for values that are the factory default, and is white for the other values.
The settings are loaded when the unit is turned on. However, operations and changes are not possible in the following cases.
   - When the control lock is on, the ⛔ mark is displayed and the settings cannot be changed. (→page 48)
   - [PEAKING] displays the outline correction edge on the outer perimeter of the screen in SINGLE screen or QUAD screen mode.
   - When [MONO] (→page 29) is set to [ON], the [PHASE] and [CHROMA] operations are disabled.
   - [FOCUS-IN-RED] is enabled during operation of the FOCUS-IN-RED function.
   - When [BLACK MODE] (→page 37) is set to [ON], the [CONTRAST] and [BACKLIGHT] operations are disabled.

**2. Turn the rotary knob <PICTURE> to select a setting value and press the rotary knob <PICTURE>.**
   - The set value is confirmed and the menu reappears.
   - To cancel, press <MENU> before pressing the rotary knob <PICTURE>.

```
PICTURE
SETTING [FACTORY]
PEAKING          0
PHASE           50
CHROMA          50
BRIGHT          50
CONTRAST        50
BACKLIGHT      100
FOCUS-IN-RED    15

MENU EXIT  (◉) SEL.  ◉↓ ENTER
```

   - When the picture adjustment values ([PEAKING]/[PHASE]/[CHROMA]/[BRIGHT]/[CONTRAST]/[BACKLIGHT]) are changed from the factory defaults, the position pointers are displayed in white.

## Audio Volume

   - For details on how to display the audio volume, refer to "Audio Volume Display" (→ page 17).

**1. Turn the rotary knob <PICTURE> to select a setting value.**

```
VOLUME    0
```

   - Setting values are confirmed when they are changed.
   - Changing the audio volume when the audio output is muted (→ "AUDIO MUTE" page 37) immediately cancels the mute state.
   - VOLUME(X) is displayed when audio output of the unit is muted.
   - Audio volume is always available and is not affected by the [CONTROL] menu (→page 48).
   - The adjustment range is 0 to 60 (the factory default is 0).

# User Data

This unit can save up to five combinations of set values for MAIN MENU and screen adjustments made in the [PICTURE] (picture adjustment) menu as user data that can be recalled.
You can also return set values and adjustments to their factory defaults.
User data includes the following settings.
• Menu settings except [SETUP LOAD]/[SETUP SAVE] and [REMOTE] in [CONTROL] (includes the function settings of the buttons on the front panel of the unit)
• Screen adjustments made with the rotary knob <PICTURE>
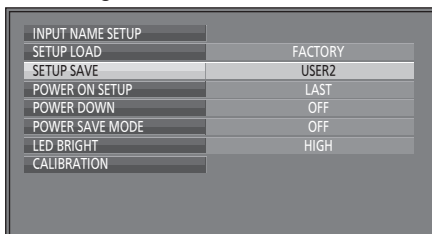

## Saving User Data

1. **Press <MENU> to display the main menu.**

2. **Turn the rotary knob <PICTURE> to select the [SYSTEM CONFIG] menu and press the rotary knob <PICTURE>.**

3. **Turn the rotary knob <PICTURE> to select the [SETUP SAVE] submenu and press the rotary knob <PICTURE>.**
   The setting values in the submenu can be changed.

   | INPUT NAME SETUP | |
   |---|---|
   | SETUP LOAD | FACTORY |
   | SETUP SAVE | USER2 |
   | POWER ON SETUP | LAST |
   | POWER DOWN | OFF |
   | POWER SAVE MODE | OFF |
   | LED BRIGHT | HIGH |
   | CALIBRATION | |

4. **Turn the rotary knob <PICTURE> to select the setup to save from [USER1] to [USER5] and press the rotary knob <PICTURE>.**
   The following screen appears.

   SETUP SAVE

   USER2

   YES    NO

   MENU EXIT  (◉) SEL.  ◉↓ ENTER  RETURN RETURN
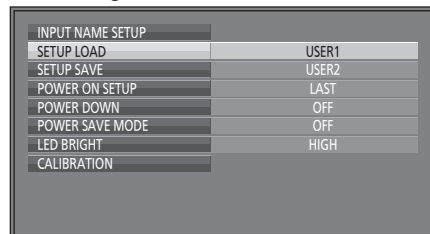

5. **Select [YES] and press the rotary knob <PICTURE>.**
   The user data is saved.

6. **To return to the previous screen, press <RETURN/VOLUME>.**

## Loading User Data

1. **Press <MENU> to display the main menu.**

2. **Turn the rotary knob <PICTURE> to select the [SYSTEM CONFIG] menu and press the rotary knob <PICTURE>.**

3. **Turn the rotary knob <PICTURE> to select the [SETUP LOAD] submenu and press the rotary knob <PICTURE>.**
   The setting values in the submenu can be changed.

   | INPUT NAME SETUP | |
   |---|---|
   | SETUP LOAD | USER1 |
   | SETUP SAVE | USER2 |
   | POWER ON SETUP | LAST |
   | POWER DOWN | OFF |
   | POWER SAVE MODE | OFF |
   | LED BRIGHT | HIGH |
   | CALIBRATION | |

4. **Turn the rotary knob <PICTURE> to select the setup to load from [USER1] to [USER5] and press the rotary knob <PICTURE>.**
   The following screen appears.
   • To return the settings to the factory defaults, select [FACTORY].

   SETUP LOAD

   USER2

   YES    NO

   MENU EXIT  (◉) SEL.  ◉↓ ENTER  RETURN RETURN
5. **Select [YES] and press the rotary knob <PICTURE>.**
   The user data is loaded.

6. **To return to the previous screen, press <RETURN/VOLUME>.**
   • The selection items of [FACTORY] are [YES(ALL)], [YES(EXCEPT USER)], and [NO].
   YES(ALL):          Initializes the data including USER DATA[1].
   YES(EXCEPT USER): Initializes the data except USER DATA.

   [1] USER DATA is the data you uploaded with the FILM GAMMA and COLOR SPACE(LUT)items.

When a set value [(H. xxxx V. yyyy)] has been confirmed, press the rotary knob <PICTURE> again to enter each of the horizontal and vertical positions.<br>(The factory defaults are H: 0960 and V: 0540.) |
| **COLOR ITEM** | ASPECT1 AREA1<br>ASPECT2 AREA2<br>CENTER<br>CROSS | Selects the marker color selection type.<br>[ASPECT1 AREA1]  Aspect 1 and area 1 marker<br>[ASPECT2 AREA2]  Aspect 2 and area 2 marker<br>[CENTER]  Center marker<br>[CROSS]  Cross marker |
| **COLOR** | WHITE<br>BLACK<br>RED<br>GREEN<br>BLUE | Selects the marker color of the item displayed in COLOR ITEM.<br>[WHITE]  white<br>[BLACK]  black<br>[RED]  red<br>[GREEN]  green<br>[BLUE]  blue |

*2 An aspect marker is not displayed if ASPECT1 MODE is 17:9 when 17:9 is selected for ASPECT RATIO. (Only the area marker will be displayed.)

*4 Displayed when the marker type set in ASPECT1 RATIO/ASPECT2 RATIO is 17:9, 16:9, or 4:3.

*5 This is enabled only for a marker set in ASPECT1 MODE.

## Main Menu (Continued)

| Submenu | Setting | Description |
|---|---|---|
| **CROSS HATCH** | <u>OFF</u><br>LOW<br>HIGH | Sets the display and density of the cross hatch.<br>[OFF]    Not displayed<br>[LOW]    Displays a dim cross hatch<br>[HIGH]   Displays a bright cross hatch |
| **SIZE** | SMALL<br>MIDDLE<br><u>LARGE</u> | Selects the cross hatch size.<br>[SMALL]   60 dots and 60 lines<br>[MIDDLE] 120 dots and 120 lines<br>[LARGE]   240 dots and 240 lines |

**<Note>**
• In PIXEL TO PIXEL mode, markers other than CROSS HATCH are not available.

## MARKER Types

### ■ Marker for 17:9 and 16:9

The marker is only displayed as a vertical bar. In addition, the ▨ section becomes the "MARKER BACK" item.

4:3 marker
13:9 marker

14:9 marker

16:9 marker

### VISTA marker, 2:1 marker, and CNSCO marker

A vertical marker may not be displayed depending on the aspect ratio setting.

VISTA marker

2:1 marker

CNSCO marker (2.35/2.39)

### Area marker

This marker is displayed as a dotted line.
95 % area marker

93 % area marker

90 % area marker

88 % area marker

80 % area marker

USER area marker*[1]
VAR area marker*[2]
DOT/LINE marker*[3]

80 % Area marker
100 % Area marker

### <Display marker of 17:9 and 16:9>
The marker is displayed based on each screen size.

17:9 size

16:9 size

### ■ Marker for 4:3

This marker is displayed as a dotted line.
95 % area marker

93 % area marker

90 % area marker

88 % area marker

80 % area marker
This marker is displayed as a dotted line.
95 % area marker

93 % area marker

90 % area marker

88 % area marker
80 % area marker
USER area marker*[1]
VAR area marker*[2]
DOT/LINE marker*[3]
80 % Area marker
100 % Area marker

### The marker can be displayed simultaneously with the markers for 17:9 and 16:9.

Simultaneous display example
The ▨ section becomes the "MARKER BACK" item.
It controls the background of the marker selected in ASPECT1.

4:3 marker
16:9 marker
16:9 marker: 95 % area marker
4:3 marker:   80 % area marker

### ■ Center marker
Center marker
This marker is displayed at the center of the screen.

### ■ Cross marker

Cross marker
Use the rotary knob <PICTURE> to move the marker. (The cross marker is half the length of the center marker and twice the width)

---
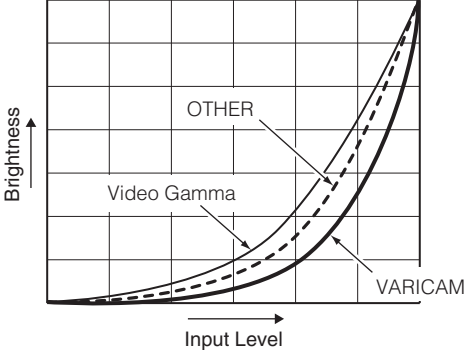

*[1] Use the rotary knob <PICTURE> to set 80 % to 100 % in 1 % increments.

*[2] Use the rotary knob <PICTURE> to set 80 % to 100 % in 1 % increments separately for vertical and horizontal.

*[3] Use the rotary knob <PICTURE> to set the H direction: 0000 to 4094 and V direction: 0000 to 2158 in increments of 1 separately for vertical and horizontal.

## VIDEO CONFIG

The underlined values are factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| **GAMMA SELECT** *1 | 2.20<br>2.35<br>2.40<br>2.60<br>FILM<br>1.00 to 3.00<br>(MANUAL SET) | Selects the gamma curve.<br>[2.20]                    Identical to STANDARD of BT-LH Series<br>[2.35]                    Identical to STDIO/PST of BT-LH Series<br>[2.40]                    CRT approximation mode<br>[2.60]                    Identical to CINEMA of BT-LH Series<br>[FILM]                  Film mode<br>[1.00 to 3.00(MANUAL SET)]   The gamma curve can be arbitrary changed in<br>                                increments of 0.05.<br>• When [FILM] is selected, the `FILM` mark is displayed for the operating status.<br>• The gamma curve setting is reflected for the video not while the setting item is being changed but after the change has been confirmed. |
| **FILM GAMMA** | VARICAM<br>OTHER<br>USER1<br>USER2<br>USER3 | Selects the FILM gamma mode type.<br>[VARICAM]                For VARICAM<br>[OTHER]                 Other<br>[USER1/USER2/USER3]    Allows you to select a user-defined value. (Factory<br>                                default setting: VARICAM)<br>• For details on user downloads, refer to the user customization function. (→page 72)<br><br>(Gumma curve image)<br> |
| **COLOR TEMP.** | USER 0 to 63 *2<br>D93<br>D65<br>D63<br>D60<br>D56<br>CINEMA<br>VAR1 *3<br>VAR2 *3<br>VAR3 *3 | Selects the color temperature.<br>[USER 0 to 63]  Setting adjustable within the range of 0 to 63 (equivalent to a<br>                        color temperature range of 3 000 K to 9 300 K)<br>[D93]                    Equivalent to a color temperature of 9 300 K<br>[D65]                    Equivalent to a color temperature of 6 500 K<br>[D63]                    Equivalent to a color temperature of 6 300 K<br>[D60]                    Equivalent to a color temperature of 6 000 K<br>[D56]                    Equivalent to a color temperature of 5 600 K<br>[CINEMA]             Equivalent to the x: 0.314 and y: 0.351 values in the CIE<br>                        chromaticity coordinates.<br>[VAR1]                 WB (WHITE BALANCE) adjustment mode<br>[VAR2]                 WB (WHITE BALANCE) adjustment mode<br>[VAR3]                 WB (WHITE BALANCE) adjustment mode |
| **VARnCOLOR TEMP.** | USER 0 to 63<br>D93<br>D65<br>D63<br>D60<br>D56<br>CINEMA | Selecting [VAR1] to [VAR3] in [COLOR TEMP.] allows you to adjust WHITE BALANCE VAR1 to VAR3. |

*1 This is grayed out when the same item is set for GPI and [GPI CONTROL] is set to [ENABLE].
*2 To select [USER 0 to 63]
    (1) Press the rotary knob <PICTURE>.
    (2) Use the rotary knob <PICTURE> to select 0 to 63 and press the rotary knob <PICTURE>.
*3 If [VAR1], [VAR2], or [VAR3] is selected, the mode becomes WB adjustment mode.

| Submenu | Setting | Description |
|---|---|---|
| **GAIN    RED** | 0 to 1023 (The factory default setting values are the values of the [D65] color temperature.) • The factory default adjustment values will be set. | Adjusts the GAIN elements for RED. |
| **GREEN** | | Adjusts the GAIN elements for GREEN. |
| **BLUE** | | Adjusts the GAIN elements for BLUE. |
| **BIAS    RED** | -512 to 511 (Factory default setting: 0) | Adjusts the BIAS elements for RED. |
| **GREEN** | | Adjusts the BIAS elements for GREEN. |
| **BLUE** | | Adjusts the BIAS elements for BLUE. |
| **RESET** | | Resets the setting values of [GAIN] (RED/GREEN/BLUE) and [BIAS] (RED/GREEN/BLUE) to the values of the color temperature selected in [COLOR TEMP]. |
| **COLOR SPACE** | SMPTE-C EBU ITU-709 *4 DCI-P3 NATIVE | Sets the studio standard color shade. [NATIVE]  Displays the color space of the three RGB primary colors unique to BT-4LH310P/BT-4LH310E. (This is the maximum color gamut that can be represented by BT-4LH310P/BT-4LH310E.) • Factory default setting       BT-4LH310P: SMPTE-C       BT-4LH310E: EBU |
| **LUT** | STANDARD USER1-3 | Reproduces colors in accordance with the set COLOR SPACE using the 3D LUT (look up table). [STANDARD]                Reproduces colors with the standard 3D LUT. [USER1/USER2/USER3]  Allows you to select a user setting value. (Factory default setting: STANDARD) • For details on user downloads, refer to the user customization function (→page 72). |
| **COLOR GAIN   RED** | 0 to 60 | Finely adjusts RED GAIN. 0 to 60 (Factory default setting: 30) |
| **GREEN** | 0 to 60 | Finely adjusts GREEN GAIN. 0 to 60 (Factory default setting: 30) |
| **BLUE** | 0 to 60 | Finely adjusts BLUE GAIN. 0 to 60 (Factory default setting: 30) |
| **SHARPNESS MODE *5** | HIGH LOW | Selects the width of the outline correction edge. [HIGH] Narrow edge [LOW]  Wide edge |
| **SHARPNESS H *5** | 0 to 60 | Sets horizontal outline correction. |
| **SHARPNESS V *5** | 0 to 60 | Sets vertical outline correction. |
| **MONO *1** | OFF ON | Switches between color and monochrome (MONO). [OFF]  Color [ON]    Monochrome • When [ON], the [CHROMA] setting is fixed to 0 and the [PHASE] setting is fixed to 50 in the [PICTURE] (picture adjustment) menu. |
| **ZOOM MODE** | OFF ON | Sets the zoom function for 4K signals (4096 x 2160 or 3840 x 2160). [OFF]  Normal display [ON]    Zooms to 4x. |
| **POSITION** | CENTER LT RT RB LB | Sets the display position for the zoom function. [CENTER]    Center [LT]            Top left position [RT]            Top right position [RB]            Bottom right position [LB]            Bottom left position |
| **FRAME GRAB** | OFF ON | Sets the function for freezing the screen display when one screen. [OFF]  Normal display [ON]    Still image display |

*1  This is grayed out when the same item is set for GPI and [GPI CONTROL] is set to [ENABLE].
*4  ITU-709 is an ITU-R BT.709 standard.
*5  This displays the outline correction edge on the outer perimeter of the screen in SINGLE screen or QUAD screen mode.

## MEASURE SETUP

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| **FOCUS-IN-RED**[*1] | OFF<br>ON | Sets the FOCUS-IN-RED function operation.<br>[OFF]  FOCUS-IN-RED function OFF<br>[ON]   FOCUS-IN-RED function ON |
| **MODE** | NORMAL<br>PRECISE | [NORMAL]  Matched to the characteristics of the same function of the BT-LH<br>       series.<br>[PRECISE]  This mode emphasizes subtle differences to enable more precise<br>       focus adjustment. |
| **COLOR** | RED<br>BLUE<br>MONO | Selects the color of outlines of the FOCUS-IN-RED function.<br>[RED]    red<br>[BLUE]   blue<br>[MONO]  Mono (Function for displaying the part that is in focus in white, and the<br>       other parts in black.) |
| **Y MAP** | OFF<br>ON | Sets the Y MAP function operation.<br>[OFF]   Normal display<br>[ON]    Y MAP display |
| **ZEBRA**[*1][*2] | OFF<br>INT.<br>EXT.<br>INT.+EXT. | Sets the ZEBRA function operation.<br>[OFF]         Normal display<br>[INT.]         ZEBRA display (INT.)<br>[EXT.]        ZEBRA display (EXT.)<br>[INT.+EXT.]  ZEBRA display (INT.+EXT.) |
| **INT. MIN. (%)** | -7 to 108<br>(Factory default setting: 70) | Sets the range for the effect of the ZEBRA function.<br>Displays the minimum value of the INT. range as a percentage of the video signal. |
| **INT. MAX. (%)** | -6 to 109<br>(Factory default setting: 85) | Sets the range for the effect of the ZEBRA function.<br>Displays the maximum value of the INT. range as a percentage of the video signal. |
| **EXT. MIN. (%)** | -7 to 108<br>(Factory default setting: 5) | Sets the range for the effect of the ZEBRA function.<br>Displays the minimum value of the EXT. range as a percentage of the video signal. |
| **EXT. MAX. (%)** | -6 to 109<br>(Factory default setting: 100) | Sets the range for the effect of the ZEBRA function.<br>Displays the maximum value of the EXT. range as a percentage of the video signal. |
| **WFM** | WFM Y<br>WFM R<br>WFM G<br>WFM B | Selects the type of WFM for when MULTI FUNCTION.<br>[WFM Y] to [WFM B]  Displays waveforms. |
| **LINE SELECT** | ALL<br>LINE xxxx | Selects the display mode of WFM.<br>[ALL]          Displays WFM.<br>[LINE xxxx]   Displays only the selected line.<br><Variable range><br>1080i (Line 0021 to Line 0560)<br>1080p (Line 0042 to Line 1121)<br>720p (Line 0026 to Line 0745)<br><Note><br>• The factory defaults are the underlined values.<br>• This can be set for each input signal format. |
| **VECTOR MODE** | ×1<br>×2S<br>×2<br>×4<br>×8 | Enlarges vector waveforms.<br>[×1]   x1<br>[x2S]  At x1 scale display only waveforms are enlarged to 2x.<br>[×2]   x2<br>[×4]   x4<br>[×8]   x8 |
| **SCALE** | 75%<br>100% | Sets the scale of a vector waveform.<br>[75%]  Displays at 75 % scale.<br>[100%] Displays at 100 % scale. |

[*1]   This is grayed out when the same item is set for GPI and [GPI CONTROL] is set to [ENABLE].

[*2]   The ZEBRA function must be set according to the following conditions.
       [INT. MIN.] < [INT. MAX.]
       [EXT. MIN.] < [EXT. MAX.]
       [EXT. MIN.] ≤ [INT. MIN.]
       [INT. MAX.] ≤ [EXT. MAX.]

## SYSTEM CONFIG

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| **FORMAT** | <u>AUTO</u><br>4K<br>2K/HD/PC | Sets the signal format for the entire system.<br>[AUTO]       Determined automatically from the input signal.<br>[4K]        4K signal<br>[2K/HD/PC]  2K/HD/PC signal |
| **4K MODE** | <u>AUTO</u><br>4096<br>3840 | Selects the format for when 4K signal.<br>[AUTO]  Determined automatically from the input signal.<br>[4096]    4096x2160<br>[3840]    3840x2160 |
| **2K/HD MODE** | <u>AUTO</u><br>2K<br>HD | Selects the format for when 2K/HD signal.<br>[AUTO]  Determined automatically from the input signal.<br>[2K]      2048x1080<br>[HD]      1920x1080 or 1280x720 |
| **1080i/PsF** | <u>AUTO</u><br>i<br>PsF | Selects the display mode for when a 1080i or 1080PsF signal is input.<br>[AUTO]  Determined automatically from the input signal.<br>[i]       Displays video signals for which IP conversion has been performed.<br>[PsF]    Displays video signals for which progressive conversion has been performed. |
| **RANGE** | <u>AUTO</u><br>FULL<br>LIMITED | Sets the quantization range of input signals.<br>[AUTO]       Determined automatically from the input signal.<br>[FULL]       0 (black level) to 1023 [10-bit]/4095 [12-bit] (white level)<br>[LIMITED]   64 [10-bit]/256 [12-bit] (black level) to 940 [10-bit]/3760 [12-bit] (white level) |
| **SDI DISPLAY MODE** | <u>SINGLE</u><br>QUAD | Selects the display mode of SDI input.<br>[SINGLE]   Displays the selected input signal over the entire screen.<br>[QUAD]    Splits the screen into four and simultaneously displays the input signals of SDI1/2/3/4. |
| **SDI1 FORMAT** | AUTO<br>3G 4:2:2 YCbCr 10bit<br>3G 4:4:4 YCbCr 10bit<br>3G 4:4:4 RGB 10bit<br>3G 4:2:2 YCbCr 12bit<br>3G 4:4:4 YCbCr 12bit<br>3G 4:4:4 RGB 12bit<br>3G 4:4:4 XYZ 12bit | Selects the SDI1 input format.<br>[AUTO]               Determined automatically from the input signal.<br>[3G 4:2:2 YCbCr 10bit]   3G 4:2:2 YCbCr 10-bit<br>[3G 4:4:4 YCbCr 10bit]   3G 4:4:4 YCbCr 10-bit<br>[3G 4:4:4 RGB 10bit]     3G 4:4:4 RGB 10-bit<br>[3G 4:2:2 YCbCr 12bit]   3G 4:2:2 YCbCr 12-bit<br>[3G 4:4:4 YCbCr 12bit]   3G 4:4:4 YCbCr 12-bit<br>[3G 4:4:4 RGB 12bit]     3G 4:4:4 RGB 12-bit<br>[3G 4:4:4 XYZ 12bit]     3G 4:4:4 XYZ 12-bit |
| **SDI2 FORMAT** | AUTO<br>3G 4:2:2 YCbCr 10bit<br>3G 4:4:4 YCbCr 10bit<br>3G 4:4:4 RGB 10bit<br>3G 4:2:2 YCbCr 12bit<br>3G 4:4:4 YCbCr 12bit<br>3G 4:4:4 RGB 12bit<br>3G 4:4:4 XYZ 12bit | Selects the SDI2 input format.<br>• For each item, refer to [SDI1 FORMAT]. |
| **SDI3 FORMAT** | AUTO<br>3G 4:2:2 YCbCr 10bit<br>3G 4:4:4 YCbCr 10bit<br>3G 4:4:4 RGB 10bit<br>3G 4:2:2 YCbCr 12bit<br>3G 4:4:4 YCbCr 12bit<br>3G 4:4:4 RGB 12bit<br>3G 4:4:4 XYZ 12bit | Selects the SDI3 input format.<br>• For each item, refer to [SDI1 FORMAT]. |

**<Note>**
For details, refer to operating instructions for the corresponding camera recorders.

■ **INPUT NAME SETUP**

The INPUT NAME SETUP function allows you to change the names of the input lines ([SDI], [SDI1], [SDI2], [SDI3], [SDI4], [Display-Port], [DisplayPort1], [DisplayPort2], [HDMI], [HDMI1], [HDMI2], and [INT-SG]) that are displayed on the status display screen and other screens.

**1.** From the [SYSTEM CONFIG] menu, turn the rotary knob <PICTURE> to select the [INPUT NAME SETUP] submenu and press the rotary knob <PICTURE>.

| INPUT NAME SETUP | |
|---|---|
| SETUP LOAD | FACTORY |
| SETUP SAVE | USER2 |
| POWER ON SETUP | LAST |
| POWER DOWN | OFF |
| POWER SAVE MODE | OFF |
| LED BRIGHT | HIGH |
| CALIBRATION | |
**2.** Turn the rotary knob <PICTURE> to select the input line name you want to change and press the rotary knob <PICTURE>.

| INPUT NAME SETUP | |
|---|---|
| SDI | SDI |
| SDI1 | SDI1 |
| SDI2 | SDI2 |
| SDI3 | SDI3 |
| SDI4 | SDI4 |
| DisplayPort | DisplayPort |
| DisplayPort1 | DisplayPort1 |
| DisplayPort2 | DisplayPort2 |
| HDMI | HDMI |
| HDMI1 | HDMI1 |
| HDMI2 | HDMI2 |
| INT-SG | INT-SG |
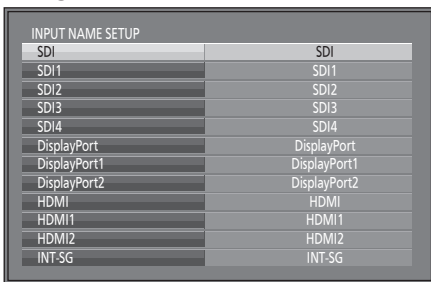

**3.** Turn the rotary knob <PICTURE> to select the position of the character you want to change and press the rotary knob <PICTURE> to confirm the position.

• Turn the rotary knob <PICTURE> to move the cursor to the position to enter a character and press the rotary knob <PICTURE> to confirm the position.

```
       INPUT NAME SETUP [SDI]

## ■CALIBRATION

The CALIBRATION function of the unit measures LCD panel characteristics from low to high brightness values and uses internal monitor processing to perform calibration.

Calibration is performed using internal signals and does not rely on the image quality settings. The CALIBRATION function of the unit performs calibration with the color temperature of D65 and derives the other color temperatures from the result of that calculation.

## ■Equipment required for calibration

- Konica Minolta CA-310 Display Color Analyzer (optional accessory)
- Konica Minolta CA-PU12 or CA-PU15 Standard Measurement Probe (optional accessory)
- RS-232C cable (male to male, straight) (optional accessory)
  Connect the RS-232C connector on the unit to the RS-232C connector on the display color analyzer.
- Set the baud rate setting of the display color analyzer to 38 400 bps.

| Analyzer Side | | (Straight) | Device side | |
|---|---|---|---|---|
| **Pin number** | **Signal** | | **Pin number** | **Signal** |
| 1 | CD | | 1 | N.C. |
| 2 | RXD | ← | 2 | TXD |
| 3 | TXD | → | 3 | RXD |
| 4 | DTR | → | 4 | DSR |
| 5 | GND | — | 5 | GND |
| 6 | DSR | ← | 6 | DTR |
| 7 | RTS | → | 7 | CTS |
| 8 | CTS | ← | 8 | RTS |
| 9 | GND | | 9 | N.C. |

**RS-232C Input terminal (9 pins)**

This unit

RS-232C cable (optional accessory)

Konica Minolta CA-310 display color analyzer (optional accessory)

Konica Minolta CA-PU15 standard measurement probe (optional accessory)

- Turn on the power of the unit and perform adequate aging (approximately 1 hour) before starting calibration.
- Make the room dark so that no external light can enter the standard measurement probe before starting the calibration. If external light enters the probe, the low brightness characteristics may not be calibrated correctly.
- LCD panel characteristics, instrument errors in the display color analyzer, and other factors may sometimes result in small differences in values after calibration.
  To further fine tune the monitor, set GAIN and BIAS for R, G, and B in the VAR mode of [COLOR TEMP.].
- If you are using CA-210, contact your supplier.

## ■CALIBRATION

Select [CALIBRATION] in the [SYSTEM CONFIG] menu to open the following menus.

| Submenu | Setting | Description |
|---|---|---|
| **AUTO CALIBRATION** *4 | | Connect a CA-310 Display Color Analyzer and then execute calibration. Select [AUTO CALIBRATION] and then select [YES] in the confirmation screen that appears to start calibration. |
| **RESET** *5 | | Returns the calibration data to the factory defaults. Select [RESET] and then select [YES] in the confirmation screen that appears to return the calibrated values to the factory defaults. |

*4 When AUTO CALIBRATION completes, [COMPLETE] appears. If it could not complete, [INCOMPLETE] appears.
*5 When RESET completes, [COMPLETE] appears.

## Main Menu (Continued)

### Executing AUTO CALIBRATION

1. From the [SYSTEM CONFIG] menu, turn the rotary knob <PICTURE> to select the [CALIBRATION] submenu and press the rotary knob <PICTURE>.

2. Turn the rotary knob <PICTURE> to select the [AUTO CALIBRATION] submenu and press the rotary knob <PICTURE>.

```
AUTO CALIBRATION

            YES              NO

  MENU EXIT  (( )) SEL.   ENTER  RETURN RETURN
```

3. Turn the power off and then back on after this operation.
### Executing RESET

1. From the [SYSTEM CONFIG] menu, turn the rotary knob <PICTURE> to select the [CALIBRATION] submenu and press the rotary knob <PICTURE>.

2. Turn the rotary knob <PICTURE> to select the [RESET] submenu and press the rotary knob <PICTURE>.

```
RESET

            YES              NO

  MENU EXIT  (( )) SEL.   ENTER  RETURN RETURN
```

3. Turn the power off and then back on after this operation.

36
## FUNCTION

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| **FUNCTION1 to FUNCTION5** | BLUE ONLY<br>GAMMA SELECT<br>WHITE BALANCE<br>MONO<br>BLACK MODE<br>R COLOR<br>G COLOR<br>B COLOR<br>SDI DISPLAY MODE<br>ZOOM MODE<br>ZOOM POSITION<br>PIXEL TO PIXEL<br>FRAME GRAB<br>DISPLAY SELECT<br>MULTI FUNCTION<br>PICTURE ASSIST<br>WFM LINE SELECT<br>AUDIO MUTE<br>LEVEL METER<br>TIME CODE<br>CLOSED CAPTION<br>MARKER<br>FRAME MARKER<br>OUTER LINE MARKER<br>CROSS HATCH<br>FOCUS-IN-RED<br>Y MAP<br>ZEBRA<br>ZEBRA LEVEL<br>SCREEN SAVER<br>LUT<br>UNDEF<br><br><br>(Factory defaults<br>FUNCTION1:<br>ZOOM MODE<br>FUNCTION2:<br>Y MAP<br>FUNCTION3:<br>FRAME GRAB<br>FUNCTION4:<br>ZEBRA<br>FUNCTION5:<br>SDI DISPLAY MODE) | Selects the functions to assign to \<FUNCTION1\> to \<FUNCTION5\><br>(front panel buttons or [FUNCTION] menu).<br>[BLUE ONLY] *1<br>  Cuts the red and green signals. The signal level of 75 % or higher is clipped.<br>[R COLOR]*1<br>  Cuts the red signals.<br>  Each press of the button toggles between ON and OFF.<br>[G COLOR]*1<br>  Cuts the green signals.<br>  Each press of the button toggles between ON and OFF.<br>[B COLOR]*1<br>  Cuts the blue signals.<br>  Each press of the button toggles between ON and OFF.<br>[SDI DISPLAY MODE]<br>  Toggles the SDI screen mode between [SINGLE] and [QUAD].<br>[ZOOM MODE]<br>  Switches the screen zoom mode for a 4K signal.<br>[ZOOM POSITION]<br>  Switches the display position for screen zoom mode.<br>  Turns the ZOOM function on or off.<br>[PIXEL TO PIXEL]<br>  Turns the PIXEL TO PIXEL function on or off.<br>[FRAME GRAB]<br>  Turns the FRAME GRAB function on or off.<br>[DISPLAY SELECT]<br>  Selects the target selection screen for QUAD mode.<br>[MULTI FUNCTION]<br>  Turns the MULTI FUNCTION function on or off.<br>[PICTURE ASSIST]*1<br>  Turns the PICTURE ASSIST function on or off.<br>[WFM LINE SELECT]<br>  Switches the display mode of WFM.<br>[AUDIO MUTE]<br>  Turns the audio volume MUTE function on or off.<br>[LEVEL METER] *2<br>  Turns the audio level meter display on or off. |

*1  The settings are canceled when the power is turned OFF.
*2  If these settings are changed, the menu settings will also change.
*3  The control settings are not available during GPI operation.
*5  High gradation portions are clipped. The backlight and contrast cannot be adjusted.

| Submenu | Setting | Description |
|---|---|---|
| (Continued from the previous page) | | [TIME CODE] *2<br>   Turns the time code display on or off.<br>[CLOSED CAPTION] *2<br>   Turns the closed caption display on or off.<br>   For details on the available operation items, refer to page 40.<br>[MARKER] *2*4<br>   Displays the marker.<br>   For details on the available operation items, refer to page 40.<br>[FRAME MARKER]<br>   Displays the frame marker.<br>   Displays the marker on the outer perimeter of the panel.<br>[OUTER LINE MARKER]<br>   Leaves the outer perimeter of the video and displays a halftone marker on the inside of it.<br>[CROSS HATCH] *2<br>   Displays the cross hatch.<br>[FOCUS-IN-RED] *3*6<br>   Turns the function that emphasizes the portion of the image in focus in red on or off.<br>[Y MAP] *2<br>   Turns the Y MAP function on or off.<br>[ZEBRA] *2*3<br>   Selects the ZEBRA function.<br>[ZEBRA LEVEL]<br>   Displays the screen for adjusting the level of the ZEBRA function.<br>[SCREEN SAVER]<br>   Turns the screen saver function on.<br>   Turns the panel backlight off to facilitate low power consumption and as a burn-in reduction measure in the event of burn-in on the panel.<br>   The function operation can be cancelled by front button operation or GPI operation.<br>[LUT]<br>   Reproduces colors in accordance with the set COLOR SPACE.<br>[UNDEF]<br>   Unset |
| **SETUP** *7 | <u>USER1</u><br>USER2<br>USER3<br>USER4<br>USER5 | Saves up to 5 sets of FUNCTION settings (FUNCTION 1 to 5). |
| **FUNCTION DISPLAY** *8 | OFF<br>ON1<br><u>ON2</u> *9 | Sets the display of the functions assigned to <FUNCTION1> - <FUNCTION5> (front panel buttons). It also selects the button action (1- touch, 2-touch, off).<br>[OFF]   1-touch action to perform function operations. Functions are not displayed.<br>[ON1]   1-touch action to display functions and perform function operations.<br>[ON2]   2-touch action to display functions and perform function operations. |

• Pressing the <FUNCTION1> to <FUNCTION5> buttons will not perform the FUNCTION operations when the [PICTURE]  (picture adjustment) menu has been displayed with the rotary knob <PICTURE>.

*2 If these settings are changed, the menu settings will also change.
*3 The control settings are not available during GPI operation.
*4 This is not displayed when all of the [ASPECT1], [AREA1], [ASPECT2], [AREA2], [CENTER] and [CROSS] settings are [OFF] in the [MARKER] menu settings.
*6 During the FOCUS-IN-RED operation, use the rotary knob <PICTURE> to change the detection sensitivity.
   The setting range is from 1 to 30, with a higher numerical value resulting in a higher detection sensitivity (the focus becomes less sharp).
*7 [USER1] to [USER 5] have the same factory defaults.
*8 The operating status is displayed regardless of the ON/OFF setting.
*9 When this is set to [ON2], the functions can be operated with the buttons when the functions are displayed.

■ **FUNCTION setting restrictions**

Under the following conditions, "INVALID FUNCTION" is displayed and the settings cannot be set.

| Setting | Condition or mode when operation not possible | |
|---|---|---|
| **BLUE ONLY** | • When Y MAP ON | |
| **GAMMA SELECT** | • When GPI item is set | |
| **WHITE BALANCE** | • When other than VAR1 to VAR3 is selected in COLOR TEMP. | |
| **MONO** | • When GPI item is set | • When Y MAP ON |
| **BLACK MODE** | • When NO SIGNAL<br>• When Y MAP ON | • When PICTURE ASSIST ON |
| **R COLOR** | • When [BLUE ONLY ON] is selected | • When Y MAP ON |
| **G COLOR** | • When [BLUE ONLY ON] is selected | • When Y MAP ON |
| **B COLOR** | • When [BLUE ONLY ON] is selected | • When Y MAP ON |
| **SDI DISPLAY MODE** | • When other than SDI input | |
| **ZOOM MODE** | • When other than 4K signal input | |
| **ZOOM POSITION** | • When other than 4K signal input | |
| **PIXEL TO PIXEL** | • When GPI item is set<br>• When other than 1280 × 720p signal input<br>• When [INT-SG] is selected | |
| **FRAME GRAB** | • When [INT-SG] is selected<br>• When [SDI] is selected and SDI DISPLAY MODE is QUAD<br>• When NO SIGNAL input | |
| **DISPLAY SELECT** | • When SDI DISPLAY MODE is SINGLE<br>• When SDI DISPLAY MODE is QUAD and MULTI FUNCTION is ON | |
| **MULTI FUNCTION** | • When other than [SDI] is selected | |
| **PICTURE ASSIST** | • When other than [SDI] is selected | |
| **WFM LINE SELECT** | • When SDI DISPLAY MODE is SINGLE<br>• When MULTI FUNCTION is other than ON<br>• When WFM LINE SELECT is ALL | |
| **LEVEL METER** | • When [INT-SG] is selected | • When PICTURE ASSIST ON |
| **TIME CODE** | • When other than [SDI] is selected | |
| **CLOSED CAPTION** | • When DisplayPort/HDMI is selected<br>• When SDI DISPLAY MODE is QUAD | • When 4K/PC signal input<br>• When [INT-SG] is selected |
| **MARKER** | • When PICTURE ASSIST ON<br>• When MULTI FUNCTION is ON<br>• When [SDI] is selected and SDI DISPLAY MODE is QUAD | • PIXEL TO PIXEL<br>• When PC signal input |
| **FRAME MARKER** | • Refer to "MARKER" above. | |
| **OUTER LINE MARKER** | • Refer to "MARKER" above. | |
| **FOCUS-IN-RED** | • When GPI item is set<br>• When BLUE ONLY ON is selected<br>• When NO SIGNAL input | • When INT-SG is selected<br>• When Y MAP ON<br>• When MULTI FUNCTION is ON |
| **Y MAP** | • When [INT-SG] is selected | • When MULTI FUNCTION is ON |
| **ZEBRA** | • When Y MAP ON<br>• When GPI item is set | • When [INT-SG] is selected |

■ **Operation items displayed on the screen during FUNCTION button operation**

Pressing any of the <FUNCTION1> to <FUNCTION5> buttons displays the operation assigned to the corresponding button as shown below.

| Setting | Display |
|---|---|
| **BLUE ONLY** | [BLUE ONLY OFF] → [BLUE ONLY ON] |
| **GAMMA SELECT** | [GAMMA2.20] → [GAMMA2.35] → [GAMMA2.40] → [GAMMA2.60] → [GAMMA FILM] → [GAMMA∗.∗∗ (MANUAL SET)] |
| **WHITE BALANCE** | [WHITE BALANCE VAR1/2/3] |
| **MONO** | [MONO OFF] → [MONO ON] |
| **BLACK MODE** | [BLACK MODE OFF] → [BLACK MODE ON] |
| **R COLOR** | [R COLOR ON] → [R COLOR OFF] |
| **G COLOR** | [G COLOR ON] → [G COLOR OFF] |
| **B COLOR** | [B COLOR ON] → [B COLOR OFF] |

| Setting | Display |
|---|---|
| **SDI DISPLAY MODE** | [SDI DISPLAY MODE SINGLE] → [SDI DISPLAY MODE QUAD] |
| **ZOOM MODE** | [ZOOM MODE OFF] → [ZOOM MODE ON] |
| **ZOOM POSITION** | [ZOOM POSITION CENTER] → [ZOOM POSITION LT] → [ZOOM POSITION RT] → [ZOOM POSITION RB] → [ZOOM POSITION LB] |
| **PIXEL TO PIXEL** | [PIXEL TO PIXEL OFF] → [PIXEL TO PIXEL ON] |
| **FRAME GRAB** | [FRAME GRAB OFF] → [FRAME GRAB ON] |
| **DISPLAY SELECT** | The displayed items differ depending on the mode.<br>• When normal mode of QUAD mode<br>　　[DISPLAY SELECT SDI1] → [DISPLAY SELECT SDI2] → [DISPLAY SELECT SDI3] → [DISPLAY SELECT SDI4]<br>• When PICTURE ASSIST mode of QUAD mode<br>　　[AREA2] → [AREA3] → [AREA4] |
| **MULTI FUNCTION** | [MULTI FUNCTION OFF] → [MULTI FUNCTION ON] |
| **PICTURE ASSIST** | [PICTURE ASSIST OFF] → [PICTURE ASSIST ON] |
| **WFM LINE SELECT** | [SETTING] |
| **AUDIO MUTE** | [AUDIO MUTE OFF] → [AUDIO MUTE ON] |
| **LEVEL METER** | [METER OFF] → [METER 2CH/4CH/8CH] |
| **TIME CODE** | [TC OFF] → [LTC/VTC/LUB/VUB/LTC+LUB/VTC+VUB] |
| **CLOSED CAPTION** | The displayed items differ depending on the [CC TYPE] selection.<br>• When the [CC TYPE] setting is [CEA-608(708)]:<br>　　[CC OFF] → [CC1/2/3/4]<br>• When the [CC TYPE] setting is [CEA-708]:<br>　　[CC OFF] → [SRV1/2/3/4/5/6]<br>• When the [CC TYPE] setting is [OP-47]:<br>　　[CC OFF] → [OP-47] |
| **MARKER** | [MARKER OFF] → [RATIO Aspect Marker Type and Area Marker Type][1]<br>Splits each of the RATIO/Aspect Marker Type/Area Marker Type into the two lines Aspect Marker 1 and Aspect Marker 2, and displays the current setting values.<br>• RATIO<br>　17:9/16:9<br>• Aspect Marker Type<br>　17:9/16:9/4:3/13:9/14:9/CNSCO 2.39/CNESCO 2.35/2:1/VISTA<br>• Area Marker Type<br>　95%/93%/90%/88%/80%/xx%[2]/yy%/zz%[3]/DOThhhh/xxxx/LINEvvvv/yyyy[4]<br><br>[1] If an area marker is displayed when aspect marker is off, the aspect marker type is displayed.<br>[2] xx% indicates an 80% to 100% USER setting.<br>[3] yy%/zz% indicates the VAR setting when an 80% to 100% aspect ratio is specified.<br>[4] hhhh/xxxx indicates the H direction setting when the area marker DOTLINE is specified, and vvvv/yyyy indicates the V direction setting. |
| **FRAME MARKER** | [FRAME MARKER OFF] → [FRAME MARKER ON] |
| **OUTER LINE MARKER** | [OUTER LINE MARKER OFF] → [OUTER LINE MARKER ON] |
| **CROSS HATCH** | [CROSS HATCH OFF] → [CROSS HATCH LOW] → [CROSS HATCH HIGH] |
| **FOCUS-IN-RED** | [FOCUS-IN-RED OFF] → [FOCUS-IN-RED RED/BLUE/MONO] |
| **Y MAP** | [Y MAP OFF] → [Y MAP ON] |
| **ZEBRA** | [ZEBRA OFF] → [ZEBRA INT.] → [ZEBRA EXT.] → [ZEBRA INT.+EXT.] |
| **ZEBRA LEVEL** | [SETTING] |
| **SCREEN SAVER** | [SCREEN SAVER OFF] → [SCREEN SAVER ON] |
| **LUT** | [STANDARD] → [USER1] → [USER2] → [USER3] |

**\<Note\>**
• [WHITE BALANCE] and [ZEBRA LEVEL] are switched to the adjustment mode with a \<FUNCTION\> button but the operating status is not displayed.
• [✳✳✳/✳✳✳] indications (for example, [CC1/2/3/4]) vary depending on the menu setting.

■**FUNCTION skip function**

This function allows you to skip some of the setting items of functions assigned to FUNCTION during FUNCTION operation.
When the operations of the functions assigned to <FUNCTION1> to <FUNCTION5> in the FUNCTION menu are performed, a submenu that allows you to skip the setting items of the functions appears. Set the setting items you want to skip during FUNCTION operation to [OFF].

A submenu appears for the following functions.
[GAMMA SELECT]/[ZOOM POSITION]/[DISPLAY SELECT]/[CROSS HATCH]/[ZEBRA]

<<Setting example>>
Select [ZEBRA] in the [FUNCTION] menu and press the rotary knob <PICTURE> to open the submenu shown below.

1. **Turn the rotary knob <PICTURE> to select the setting item you want to skip and press the rotary knob <PICTURE>.**
   • The setting value can be changed.

| ZEBRA SELECT | |
|---|---|
| INT. | ON |
| EXT. | ON |
| INT.+EXT | ON |
2. **Turn the rotary knob <PICTURE> to select [OFF] and press the rotary knob <PICTURE>.**

| ZEBRA SELECT | |
|---|---|
| INT. | OFF |
| EXT. | ON |
| INT.+EXT | ON |
3. **Press <RETURN/VOLUME>.**
   • The submenu closes and the [FUNCTION] menu reappears.

■**SDI DISPLAY MODE function**

SDI DISPLAY MODE function allows you to select the display mode for SDI input video.
• When [SINGLE] is set, the selected input video is displayed over the entire screen.
• When [QUAD] is set, the entire screen is split into four areas and the input video of each of SDI1, SDI2, SDI3, and SDI4 is displayed in a separate area.
  The display positions of SDI1, SDI2, SDI3, and SDI4 are fixed (SDI1 at top left, SDI2 at top right, SDI3 at bottom left, and SDI4 at bottom right).

**<Note>**
• When video is displayed while [QUAD] is set, inputs in the same format as the SDI1 input are displayed.
• The audio level meter and time code can be displayed for each input video when [QUAD] is set.
• Normal mode, [PICTURE ASSIST] mode, and [MULTI FUNCTION] mode are available when [QUAD] is set. For each mode, the display can be changed by turning the function on or off.
• When [QUAD] is set, a 4K signal cannot be displayed.

Press the same button again

SINGLE screen

Press the <FUNCTION> button to which the SDI DISPLAY MODE function has been assigned.

QUAD screen
■ **PICTURE ASSIST function**

The PICTURE ASSIST function displays the same input video on four screens.
Use this function to apply an effect in each screen while checking the video at the top left. This can be very helpful during shooting with the camera.

Press the same button again

Normal screen

The signal selected with [INPUT] is displayed on a single screen.

Video

Press the <FUNCTION> button to which the PICTURE ASSIST function has been assigned.

Video    Video

• List of functions
  GAMMA SELECT
  FILM GAMMA
  COLOR TEMP.
  COLOR SPACE
  COLOR GAIN
  SHARPNESS

  CHROMA
  BRIGHT
  CONTRAST
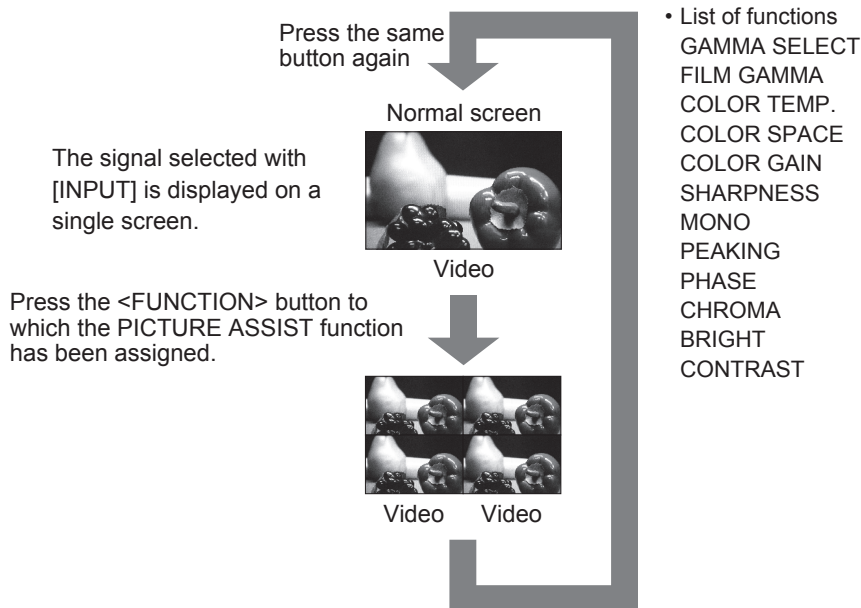

**<Note>**
• Select the screen to which to apply the effect in DISPLAY SELECT. (AREA2 indicates the top right screen, AREA3 indicates the bottom left screen, and AREA4 indicates the bottom right screen.)
• When the PICTURE ASSIST function is on and the Y MAP function is turned on while one of the [BLUE ONLY], [R COLOR], [G COLOR], and [B COLOR] functions is on, the [BLUE ONLY], [R COLOR], [G COLOR], and [B COLOR] effects cannot be applied to the other screens.
• When the PICTURE ASSIST function is turned on, BLACK MODE setting is turned off.
• When the PICTURE ASSIST function is turned on, the MULTI FUNCTION setting is turned off.
• When the PICTURE ASSIST function is turned on in SINGLE screen mode, SDI DISPLAY MODE also becomes QUAD at the same time. When the PICTURE ASSIST function is turned off later, SDI DISPLAY MODE also becomes SINGLE.
• When the PICTURE ASSIST function is turned on, the audio level meter and time code are not displayed.
• If the power is turned off while the PICTURE ASSIST function is on, the PICTURE ASSIST function will be off and the unit will start up in the QUAD state when the power is turned on the next time.

■ **MULTI FUNCTION function**

Use the MULTI FUNCTION function to display FOCUS-IN-RED, WFM, and VSC simultaneously for the original image. (2K and HD signals only)
Each press of the <FUNCTION1> to <FUNCTION5> (→page 12) button with the MULTI FUNCTION function assigned changes the display.

MULTI FUNCTION screen
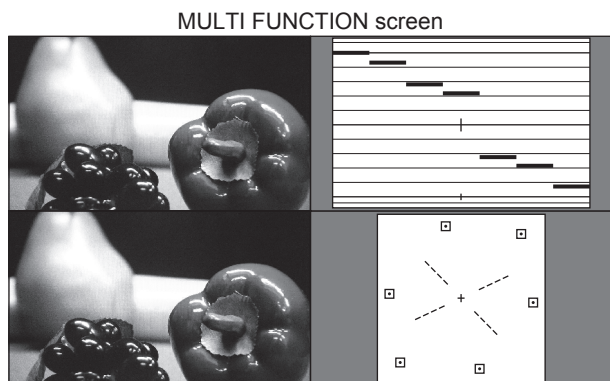

Top left screen: Normal screen
Top right screen: WFM screen
Bottom left screen: FOCUS-IN-RED screen
Bottom right screen: VECTOR screen

**<Note>**
• When the MULTI FUNCTION function is turned on, the PICTURE ASSIST setting is turned off.
• When the MULTI FUNCTION function is turned on in SINGLE screen mode, SDI DISPLAY MODE also becomes QUAD at the same time. When the MULTI FUNCTION function is turned off later, SDI DISPLAY MODE also becomes SINGLE.
• When the MULTI FUNCTION function is turned on, the YMAP setting is turned off.
• When the MULTI FUNCTION function is turned on, the FOCUS-IN-RED setting is also turned on.
  Furthermore, when the MULTI FUNCTION function is turned off, the FOCUS-IN-RED setting is also turned off.
• When the MULTI FUNCTION function is turned on, the audio level meter and time code are displayed only in the top left area.

■**WFM/VECTOR**

The WFM/VECTOR function allows you to display waveform and vector display screens. Set WFM display and VECTOR display in the [MEASURE SETUP] item of the [MAIN MENU] (main menu). (→page 30)

100 %

50 %

0 %

109 %

A dotted line indicates for each 10 % increase.

−4%

RED      MAGENTA

I axis

YELLOW

BLUE

The frame is approx. 2.5 degrees and approx. 2.5 %.

Q axis

GREEN

CYAN
The horizontal lines in each frame are color coded to simplify identification.

**<Note>**
• The WFM/VECTOR display is shifted one line at a set interval to prevent temporary afterimage (burn-in).

■**FRAME GRAB function**

The FRAME GRAB function stores the entire screen in the unit and displays it as a still image.
• The screen changes each time you press the <FUNCTION1> to <FUNCTION5> (→page 12) button with the FRAME GRAB function assigned.
• Use the FRAME GRAB function while a signal is being input. When the input signal is distorted, display may be distorted or some parts may not be displayed. Also, the function will be disabled if there is no signal or the operation to switch the signal format, switch the screen mode, or turn the power off is performed.

Press the same button again

SINGLE screen

Press the <FUNCTION> button to which the FRAME GRAB function has been assigned.

SINGLE screen
**<Note>**
• When FRAME GRAB is turned on/off, the AUDIO MUTE function is also turned on/off at the same time.
• This function is for when all of the inputs are the same format.
  If inputs of different formats are displayed, the display may be distorted or some parts may not be displayed.
• If a frame is grabbed when the time code is displayed, the time code also stops at the same time but the video and time code value do not match.
• When the FRAME GRAB function is turned on, some functions such as Y MAP do not work.

■**ZOOM**

Use the ZOOM function to display a 4K signal in zoom mode. (4K signals only)
Set this in the [VIDEO CONFIG] item of [MAIN MENU] (main menu). (→page 28)
Press the <FUNCTION1> to <FUNCTION5> (→page 12) button with the ZOOM function assigned to change the display in the following order.

Normal screen

ZOOM display

## Main Menu (Continued)
**■ ZOOM POSITION display position sequence**

Display position of ZOOM POSITION: ① → ② → ③ → ④ → ⑤ → ① → and so on

| ① CENTER | ② LT | ③ RT | ④ RB | ⑤ LB |
**■ ZEBRA**

The stripes of the ZEBRA function appear over an image (in the viewfinder) to help you adjust the aperture of a camera lens for optimum exposure and easily find the areas of an image that are overexposed and white (where clipping occurs).
Press the <FUNCTION1> to <FUNCTION5> (→page 12) button with [ZEBRA LEVEL] assigned in the [MEASURE SETUP] menu to set the [INT. MIN.], [INT. MAX.], [EXT. MIN.] and [EXT. MAX.] levels.
Press the <FUNCTION1> to <FUNCTION5> button with [ZEBRA] assigned to turn the ZEBRA function on.

[INT. MIN.] and [INT. MAX.] show ZEBRA stripes for areas within the range set in the menu.
[EXT. MIN.] and [EXT. MAX.] show ZEBRA stripes for areas outside the range set in the menu.

[INT. MIN.] and [INT. MAX.] ZEBRA pattern

[EXT. MIN.] and [EXT. MAX.] ZEBRA pattern
**<Note>**
• Black sections outside the image area may also be shown as ZEBRA stripes.
• The ZEBRA pattern may become offset by input selection or function operation.

**■ Y MAP**

The Y MAP function makes it easy to visually confirm the overall screen brightness (luminance level map).
Press the <FUNCTION1> to <FUNCTION5> (→page 12) button with [Y MAP] assigned to turn the function on.
Turning on this function displays a simplified chart at the left side of the screen.

• Simplified chart details (The numbers in the simplified chart indicate Y signal levels.)

| Y signal level | Color | Scale |
|---|---|---|
| >100 % | Red | |
| 100 % | Dark Orange | 100 % |
| 95 % | | |
| 85 % | Orange | |
| 75 % | Yellow | 75 % |
| 60 % | Light Gray | |
| 40 % | Gray | 50 % |
| 20 % | Dark Gray | 25 % |
| 10 % | Blue | |
| 0 % | Dark Blue | 0 % |
| <0 % | Magenta | |
**<Note>**
• When [HALF] or [BLACK] is selected in the [BACK] item of the [MARKER] menu, the simplified chart indicates a signal level of 50 % or may not be displayed at all.
• When the Y MAP function is turned on, [BLACK MODE] is turned off.
• The black parts outside the image area may be displayed at 0 % (dark blue) or less than 0 % (magenta).

■**PIXEL TO PIXEL**

The PIXEL TO PIXEL function allows you to check images at their actual pixel resolution. (Supported format: 1280×720p signal)

The underlined values are the factory defaults.

| Item | Setting | Description |
|---|---|---|
| **PIXEL TO PIXEL**[10] | <u>OFF</u><br>ON | Sets whether to display the screen display size at the input signal size.<br>[OFF] Not displayed      [ON] Displayed. |

[10]The following setting is disabled when [PIXEL TO PIXEL] is [ON].
• [MARKER] display

■**CROSS HATCH**

The CROSS HATCH function displays markers at regular vertical and horizontal intervals to facilitate composition and other tasks. The marker line width is 1 dot per line and the interval is LARGE (240 dots/240 lines), MIDDLE (120 dots/120 lines), or SMALL (60 dots/60 lines) depending on the [SIZE] setting in the [MARKER] menu (→page 26).
Each press of the <FUNCTION1> to <FUNCTION5> (→page 12) button with the CROSS HATCH function assigned changes the display.

**Each press of the <FUNCTION> button with the CROSS HATCH function assigned changes the display as shown below.**

Press the same button again (to return to the original image without cross hatch)

Press the same button again → Dim cross hatch

Press the same button again → Bright cross hatch
■**FOCUS-IN-RED**

The FOCUS-IN-RED function displays the outline of the subject in focus in a color that simplifies focusing with the camera.
Each press of the <FUNCTION1> to <FUNCTION5> button with the FOCUS-IN-RED function assigned changes the display.
• To use the FOCUS-IN-RED function, you need to assign it to one of <FUNCTION1> to <FUNCTION5>.

When the FOCUS-IN-RED function is displayed, use the rotary knob <PICTURE> to change the detection sensitivity level (1 to 30). A higher numerical value results in higher detection sensitivity (outlines are displayed in the set color even when they are not properly focused).
The outline color can be switched between RED, BLUE, and MONO in the [FOCUS-IN-RED COLOR] setting of the [MEASURE SETUP] menu (→page 30).
Also, from the [FOCUS-IN-RED MODE] setting, you can select NORMAL or PRECISE for the method of applying outlines.

Press the same button again

Normal screen

FOCUS-IN-RED display

The foreground is in focus

Press the <FUNCTION> button with the FOCUS-IN-RED function assigned.

The outline of the object in focus is displayed in a color

The background is in focus

Press the <FUNCTION> button with the FOCUS-IN-RED function assigned.
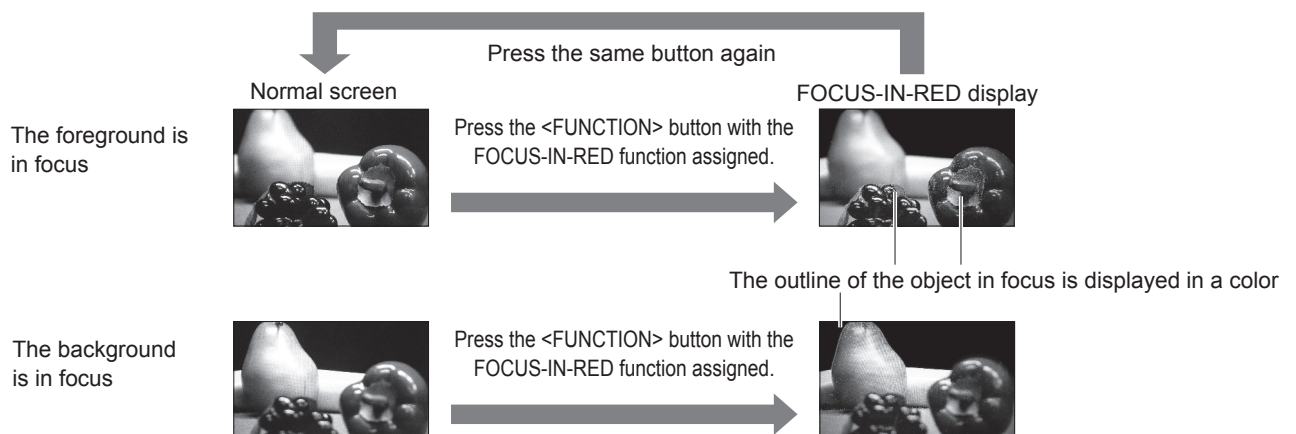

**<Note>**
• When you are using the PIXEL TO PIXEL or ZOOM function, the FOCUS-IN-RED function display may look slightly different than usual.

## AUDIO

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| **GROUP SELECT** | <u>CH1-CH8</u><br>CH9-CH16 | Selects the group of 16-channel audio in the SDI signal.<br>[CH1-CH8]  Displays channels 1 to 8.<br>[CH9-CH16]  Displays channels 9 to 16. |
| **SELECT L** *¹ *² | CH1 to CH16<br>(Factory default: <u>CH1</u>) | Selects the embedded audio channels to output to the speaker or headphones (L). |
| **SELECT R** *¹ *³ | CH1 to CH16<br>(Factory default: <u>CH2</u>) | Selects the embedded audio channels to output to the speaker or headphones (R). |
| **SPEAKER OUT** | <u>MIX</u><br>L<br>R | Selects the speaker output status.<br>[MIX] Outputs a combination of the audio selected in [SELECT L] and [SELECT R].<br>[L]     Outputs the audio selected in [SELECT L].<br>[R]     Outputs the audio selected in [SELECT R]. |
| **4K INPUT SELECT** | | Selects the audio input for 4K signals (SDI [QUAD], DisplayPort [DUAL], or HDMI [DUAL]). |
| **SDI** | <u>SDI1</u><br>SDI2<br>SDI3<br>SDI4 | Selects the audio input for when SDI input. |
| **DisplayPort** | <u>DisplayPort1</u><br>DisplayPort2 | Selects the audio input for when DisplayPort input. |
| **HDMI** | <u>HDMI1</u><br>HDMI2 | Selects the audio input for when HDMI input. |

*¹ After a change of [GROUP SELECT] is confirmed, the change is reflected in the channel setting display of [SELECT L] and [SE-LECT R].
*² During HDMI/DisplayPort signal input, the audio of CH1 is output regardless of the menu setting.
*³ During HDMI/DisplayPort signal input, the audio of CH2 is output regardless of the menu setting.

## DISPLAY SETUP

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| TIME CODE | <u>OFF</u><br>ON | Selects whether to enable or disable time code display. |

| CH SELECT | 2CH<br>4CH<br><u>8CH</u> | Selects the number of audio level meter channels.<br>• 16 channels cannot be displayed simultaneously. |
| POINT LINE | OFF<br><u>ON</u> | Turns the 0 dB point and reference point in the meter display on or off. |
| CH INFO. | OFF<br><u>ON</u> | Switches the channel displayed in the meter display on or off. |
| HEAD ROOM | 12dB<br><u>18dB</u><br><u>20dB</u> | Sets the display position of the reference point in the meter display.<br>• Factory default setting<br>　　BT-4LH310P: 20dB<br>　　BT-4LH310E: 18dB |

47

## CONTROL

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| **CONTROL** | LOCAL<br>REMOTE | Selects operation. (With control lock)<br>[LOCAL] Enables front panel operation (including controls that use the GPI function).<br>[REMOTE] Enables remote operation (control using RS-232C or RS-485; the front panel operation is locked).<br>    • Powering on/off, VOLUME operations, GPI control, and menu display are available when the lock is engaged.<br>    • Only the settings of the [CONTROL] and [LOCK ENABLE] menu items can be changed when the lock is engaged.<br>    • The rotary knob <PICTURE> is disabled when the lock is engaged.<br>    • Operation when the lock is engaged is in accordance with the [LOCK ENABLE] setting.<br>    • The ⌼ mark is displayed in the operating status display, menu display ([MAIN MENU] (main menu), [FUNCTION] menu, and [INPUT SELECT] menu), [PICTURE] (picture adjustment) menu, and function display screens when the lock is engaged.<br><br>MAIN MENU ⌼ ——— Mark<br>MAEKER<br>VIDEO CONFIG<br>MEASURE SETUP<br>SYSTEM CONFIG<br>FUNCTION<br>AUDIO |
| **LOCAL ENABLE** *1 | DISABLE<br>INPUT<br>FUNCTION<br>INPUT+FUNC. | Selects whether to enable or disable the <INPUT SELECT> and <FUNCTION> button operations when [REMOTE] is selected in [CONTROL].<br>[DISABLE]    Disables the <INPUT SELECT> and <FUNCTION> button operations.<br>[INPUT]    Enables the <INPUT SELECT> button operation.<br>[FUNCTION]    Enables the <FUNCTION> button operation.<br>[INPUT+FUNC.]  Enables the <INPUT SELECT> and <FUNCTION> button operations. |
| **GPI** | | Displays GPI related menus. |
| **RS-485 ID SETUP** | 0 to 126<br>(Factory default setting: 0) | Sets the ID number of the unit for communication using RS-485. |

*1 This is only available when [CONTROL] is [REMOTE].

■ **GPI related**

| Submenu | Setting | Description |
|---|---|---|
| **GPI CONTROL** | DISABLE<br>ENABLE | Enables and disables the GPI functions.<br>[DISABLE] Disables    [ENABLE] Enables |
| **GPI1 to GPI8** | UNDEF<br>INPUT SDI<br>INPUT DisplayPort DUAL<br>INPUT DisplayPort SINGLE<br>INPUT HDMI DUAL<br>INPUT HDMI SINGLE<br>INPUT INT-SG<br>R-TALLY<br>G-TALLY<br>MONO | Sets the PIN assignment of the GPI input connector.<br>The items that can be set are the same for each terminal.<br>(For details, refer to page 54) |

48

| Submenu | Setting | Description |
|---|---|---|
| (Continued from the previous page) | GAMMA SEL. 2.20<br>GAMMA SEL. 2.40<br>GAMMA SEL. 2.60<br>GAMMA SEL. FILM<br>GAMMA SEL. MANUAL SET<br>PIXEL TO PIXEL<br>FOCUS-IN-RED<br>ZEBRA<br>REMOTE STANDBY | |

**<Note>**

Operation may not be possible depending on the setting conditions.

Example: PIXEL TO PIXEL operation when the input signal is 4K

## INFORMATION

| Submenu | Setting | Description |
|---|---|---|
| **HOURS METER** | | Displays the total number of hours that have elapsed. |
| **SDI ERROR LOG** | | Displays the SDI error log. |

## HOURS METER

| Submenu | Setting | Description |
|---|---|---|
| **OPERATION** | xxxxxxh *1 | Displays the total number of hours the unit has been on. |
| **LCD** | xxxxxxh *1 | Displays the number of hours the backlight has been on. |

*1 "xxxxxx" indicates up to 262800 hours (approximately 30 years). [OVER] is indicated when the number of hours is 262800 or higher.

## SDI ERROR LOG

Displays the log for SDI errors (CRCC errors and PAYLOAD ID errors).

**<Note>**

• The SDI input connector and time code value are also displayed at the same time.
• Up to 10 logs can be saved, and the logs are deleted from the oldest when that number is exceeded.
• The logs are deleted when the power is turned off.
• Performing a reset turns off the status error display.

# REMOTE Specifications

This unit can be operated externally via the GPI input connector, the RS-232C input connector, or the RS-485 input/output connectors.

## GPI Input Connector

GPI screen items correspond to the following terminals. Assign a function to each terminal in the GPI screen of the menu. (→page 48) The function assigned to each terminal is executed as specified depending on whether GND (pin 5) is short-circuited (ON) or open (OFF).
**■ Operating conditions**

Level operation: Operates when GND is short-circuited.
Edge operation: Operates when GND changes from open to short-circuited.
**<Note>**
- When level operation is assigned to more than one terminal, the function operates while any of the terminals is short-circuited.
- Hold the edge operation for at least 0.2 seconds after the change.

**GPI input connector (9 pins)**

| Pin number | Signal |
|---|---|
| 1 | GPI1 |
| 2 | GPI2 |
| 3 | GPI3 |
| 4 | GPI4 |
| 5 | GND |
| 6 | GPI5 |
| 7 | GPI6 |
| 8 | GPI7 |
| 9 | GPI8 |

| Assigned item | Function | Operating conditions |
|---|---|---|
| INPUT SDI | Switches the input line to SDI.*1 | Edge operation |
| INPUT DisplayPort DUAL | Switches the input line to DisplayPort DUAL.*1 | Edge operation |
| INPUT DisplayPort SINGLE | Switches the input line to DisplayPort SINGLE.*1 | Edge operation |
| INPUT HDMI DUAL | Switches the input line to HDMI DUAL.*1 | Edge operation |
| INPUT HDMI SINGLE | Switches the input line to HDMI SINGLE.*1 | Edge operation |
| INPUT INT-SG | Switches the input line to INT-SG.*1 | Edge operation |
| R-TALLY *2 | Lights the red tally. | Level operation (Short-circuited: ON, Open: OFF) |
| G-TALLY *2 | Lights the green tally. | Level operation (Short-circuited: ON, Open: OFF) |
| MONO | Enables or disables monochrome display. | Level operation (Short-circuited: ON, Open: OFF) |
| GAMMA SEL.2.20 | Switches the gamma characteristic to 2.20. | Level operation (Short-circuited: ON, Open: OFF) |
| GAMMA SEL.2.40 | Switches the gamma characteristic to 2.40. | Level operation (Short-circuited: ON, Open: OFF) |
| GAMMA SEL.2.60 | Switches the gamma characteristic to 2.60. | Level operation (Short-circuited: ON, Open: OFF) |
| GAMMA SEL.FILM | Switches the gamma characteristic to FILM. | Level operation (Short-circuited: ON, Open: OFF) |
| GAMMA SEL.MANUAL SET | Switches the gamma characteristic to MANUAL SET. | Level operation (Short-circuited: ON, Open: OFF) |
| PIXEL TO PIXEL | Switches the screen display between input size and display size. | Level operation (Short-circuited: ON, Open: OFF) |
| FOCUS-IN-RED | Displays the outlines of the subject in focus in red or another color. | Level operation (Short-circuited: ON, Open: OFF) |
| ZEBRA | Superimposes the ZEBRA pattern over the image with a specified brightness signal level. | Level operation (Short-circuited: ON, Open: OFF) |
| REMOTE STANDBY*3*4 | Sets remote standby (turns off the backlight). | Level operation (Short-circuited: ON, Open: OFF) |

*1 The operation is the same as that performed with the front button.
*2 When [R-TALLY] and [G-TALLY] turn on simultaneously, the tally color is amber.
*3 When remote standby is set to ON, the power lamp on the front panel flashes.
*4 If you use a menu to set this function after short-circuiting the GPI input connector to which it will be assigned, the backlight turns off and the screen display goes blank making it impossible to check the menu operation. To change the setting of this item, be sure to set it when the GPI input connector is in the open state.

| Restrictions |

- The same as the restrictions for FUNCTION operations.
- The restrictions for INPUT operations are the same as for INPUT SELECT on the front.

## REMOTE Specifications (Continued)

■**Priority of assigned items**
  • When [GAMMA SEL. 2.20], [GAMMA SEL. 2.40], [GAMMA SEL. 2.60], [GAMMA SEL. FILM], and [GAMMA SEL. MANUAL SET] are [ON] at the same time, [GAMMA SEL. 2.20] takes priority. The mode priority order is [GAMMA SEL. 2.20] > [GAMMA SEL. 2.40] > [GAMMA SEL. 2.60] >  [GAMMA SEL. FILM] > [GAMMA SEL. MANUAL SET]. The gamma is 2.35 when none of the GAMMA SEL items is selected.

### RS-232C Input Connector

The unit can be operated externally via the RS-232C interface.
For details on the pin arrangement and connection of the RS-232C input connector, refer to the diagram below and the tables on the right below.
For details on specific systems using RS-232C input connectors, contact your supplier.

**RS-232C input connector
(9 pins)**
| External device side | | (Straight) | Device side | |
|---|---|---|---|---|
| **Pin number** | **Signal** | | **Pin number** | **Signal** |
| 1 | N.C. | | 1 | N.C. |

■**Connectors and signals**
  **Connector: D-SUB 9-pin (female)**
  **Signal**

| Pin number | Signal | Description |
|---|---|---|
| 1 | N.C. | Not connected |
| 2 | TXD | Transmission data |
| 3 | RXD | Reception data |
| 4 | DSR | Connected inside |
| 5 | GND | Ground |
| 6 | DTR | Connected inside |
| 7 | CTS | Connected inside |
| 8 | RTS | Connected inside |
| 9 | N.C. | Not connected |

■**Communication parameters**

| | |
|---|---|
| Signal level | RS-232C compliant |
| Synchronous system | Asynchronous system |
| Transfer rate | 9 600 bps |
| Parity | None |
| Data length | 8 bit |
| Stop bit | 1 bit |
| Flow control | None |

■**Command format**

| STX (02h) | Command | : | Data | ETX (03h) |
|---|---|---|---|---|

• The command is a 3-character string starting with STX and ending with ETX.
• Append any data after the colon (:) following the command, as required.

■**Response formats**
**1.Setting command response**

| STX (02h) | Command | ETX (03h) |
|---|---|---|

**2.Query command response**

| STX (02h) | Data | ETX (03h) |
|---|---|---|

**3.Error response**

| STX (02h) | Error codes | ETX (03h) |
|---|---|---|

Error codes
ER001: Invalid command
ER002: Parameter error

## REMOTE Specifications (Continued)

### RS-485 Input/Output Connectors

The unit can be operated externally via the RS-485 interface.
Refer to the figures below for the pin arrangement and connection of the RS-485 input/output connectors.
For details on specific systems using RS-485 input/output connectors, contact your supplier.

Connection example

| RS-485 IN | RS-485 OUT | RS-485 IN | RS-485 OUT | RS-485 IN | RS-485 OUT |

• A daisy chain connection using the RS-485 input/output connectors enables the control of multiple monitors (up to 32 monitors).
• Connect a terminating resistor (120 Ω) between the first and second pin of the OUT connector on the last monitor in the chain.

#### ■ Connectors and signals

Connector: 8-pin RJ-45 connector

IN        OUT

| Pin number | | Signal | Description |
|---|---|---|---|
| IN (input) | OUT (output) | | |
| 1 | 3 | RXD+ | Received data (+) |
| 2 | 6 | RXD- | Received data (-) |
| 3 | 1 | TXD+ | Send data (+) |
| 4 | 4 | N.C. | Not connected |
| 5 | 5 | N.C. | Not connected |
| 6 | 2 | TXD- | Send data (-) |
| 7 | 7 | N.C. | Not connected |
| 8 | 8 | GND | Ground |

#### ■ Communication parameters

| Synchronous system | Asynchronous system |
|---|---|
| Transfer rate | 38 400 bps |
| Parity | EVEN |
| Data length | 8 bit |
| Stop bit | 1 bit |
| Flow control | None |

#### ■ Command format

| STX (02h) | Header (ID) | Command | Data | EXT (03h) |
|---|---|---|---|---|

The header (ID) is 8-bit data.
Set this in the [RS-485 ID SETUP] item of the [SYSTEM CONFIG] menu.
When 0 is set in [RS-485 ID SETUP], multiple connected monitors can be controlled.

#### ■ Response formats

**1. Setting command response**

| STX (02h) | Command | EXT (03h) |
|---|---|---|

**2. Query command response**

| STX (02h) | Data | EXT (03h) |
|---|---|---|

**3. Error response**

| STX (02h) | Error codes | EXT (03h) |
|---|---|---|

Error codes
ER001: Invalid command
ER002: Parameter error

When 0 is set in [RS-485 ID SETUP], operation is enabled but responses are not.

After receiving a monitor response command, there should be a time lag of approx. 200 ms before a command is transmitted from an external control device.

■**Setting command**

*1 With a SDI QUAD line (MULTI FUNCTION/PICTURE ASSIST) command, priority is given to switching to the mode input by command input.
(When this is switched to OFF, the mode becomes QUAD screen.)

*2 Configures settings for the CLOSED CAPTION, CC TYPE, CAPTION CHANNEL, CAPTION SERVICE menu items of DISPLAY SETUP simultaneously.

*3 Responds with the setting states of the CLOSED CAPTION, CC TYPE, CAPTION CHANNEL, CAPTION SERVICE menu items of DISPLAY SETUP.

# Error and Warning Information

If for any reason an error occurs in the unit, the following is displayed to notify of the error or warning.

| Error/warning | Symptom | Remedy |
|---|---|---|
| **Warning of drop in external DC input voltage/ LOW VOLTAGE** | The [LOW VOLTAGE] indication in blue flashes on the screen.<br>This means that the external DC power supply input voltage has dropped to less than approximately 22.0 V. | When the unit is powered down, connect an external DC power supply providing 23.4 V or more and then turn the POWER switch on. |
| | The [LOW VOLTAGE] indication lights red on the screen and the power is turned off approximately 10 seconds later.<br>This means that the external DC power supply input voltage has dropped below approximately 21.5 V. | |

# Cleaning

• Gently wipe off any dirt on the cabinet and LCD panel with a soft cloth. To remove stubborn dirt, use a cloth that has been dampened in a weak neutral detergent solution and thoroughly wrung out and then wipe the unit with a dry cloth. Any moisture entering the unit may damage it.
• Never use alcohol, benzene, thinner, chemically-treated cloth, etc. to clean the unit.
  The surface may become discolored and the paint may peel off.
• Do not directly expose the unit to spray cleaner or the like. Any moisture entering the unit could damage it.

# Specifications

## ■ General

Power input

| Power supply voltage | Current consumption |
|---|---|
| AC: 100 - 240 V, 50/60 Hz | 1.71 A - 0.67 A |
| DC: 28 V (23.4 - 30 V) | 4.59 A |

☐ indicates safety information.

| | |
|---|---|
| Dimensions (W x H x D): | 758 mm × 495 mm × 258 mm (29-13/16″ × 19-1/2″ × 10-3/16″) (including stand) |
| | 758 mm × 474 mm × 132 mm (29-13/16″ × 18-5/8″ × 5-3/16″) (unit only, not including stand) |
| Weight: | 20.0 kg (44.1 lbs) (including stand) |
| | 18.5 kg (40.8 lbs) (unit only, not including stand) |
| Operating temperature range: | 5 ºC to 35 ºC (41 ºF to 95 ºF) (up to 2 000 m(6561′ 1/8″) above sea level) |
| Operating humidity range: | 20% to 80% (non-condensing) |
| Storage temperature: | -20 ºC to 60 ºC (-4 ºF to 140 ºF) |

## ■ Display panel

| | |
|---|---|
| Dimensions: | 78.9 cm (31.1″) (effective display area) |
| Aspect ratio: | 17:9 |
| Number of pixels: | 4096 × 2160 |
| Display colors: | Approx. 1 000 000 000 |
| Viewing angle (contrast > 10:1): | 178 degrees left/right, 178 degrees up/down |

## ■ Connectors

| | |
|---|---|
| SDI inputs: | BNC x 4 |
| | SMPTE ST 424 / 425-1 / 274 / 296 compliant |
| | EMBEDDED AUDIO supported |
| | 3G-SDI:  SMPTE ST 299 compliant |
| | 48 kHz, synchronous supported |
| | 16 channels supported |
| | HD-SDI:  SMPTE ST 299 compliant |
| | 48 kHz, synchronous supported |
| | 8 channels supported |
| HDMI: | HDMI connector x 2 (Type A) |
| | HDCP supported |
| | EMBEDDED AUDIO supported |
| | VIERA Link not supported |
| DisplayPort input: | DisplayPort connector x 2 |
| | HDCP supported |
| | EMBEDDED AUDIO supported |
| SDI output (active through-out): | BNC x 4 |
| GPI: | D-SUB, 9-pin x 1 |
| RS232C: | D-SUB, 9-pin x 1 |
| RS485: | RJ-45 x 2 (input and output) |
| Headphones: | Stereo mini jack M3 x 1, 32 Ω, level adjustable |

## ■ Other connectors

| | |
|---|---|
| Speaker output: | Monaural 0.5 W |
| Tally output (display): | Red, green, and amber |

*1 The frame frequency of 1/1.001 is also supported.
*2 In the case of DUAL, it is necessary to input signals with the same resolution and frame frequency, and vertical synchronization timing that matches.
*3 If the HDMI signal input connector and DisplayPort1 signal input connector are disconnected and connected, all of the screens may be become momentarily distorted.
*4 Displayed as a video signal.
*5 CEA-861-D
*6 VESA DMT
Only 60 Hz is supported for the frame frequency.
*7 VESA DMT Reduced Blanking
Only 60 Hz is supported for the frame frequency.

<Note>
The RGB and YCbCr formats and 8-bit, 10-bit, and 12-bit are switched automatically according to the input signal.

## Specifications (Continued)

### ■ Closed caption decoding

**Supported signals**

| HD-SDI | 1080/60i[1], 1080/50i, 720/60p[1], 1080/24PsF[1], 1080/30p[1], 1080/24p[1] |
|---|---|

**Supported standards**

| HD-SDI | EIA/CEA-608 (708), EIA/CEA-708, OP47 |
|---|---|

**Supported specifications (EIA/CEA-608)**

| Decode channels | CC1 to CC4[2] |
|---|---|
| Character | Standard Character, Special Character |

**Supported specifications (EIA/CEA-708)**

| Caption service | Service #1 to #6 |
|---|---|
| Character | G0 Code, G1 Code, Window Style[3], Pen Style[4] |

[1] The frame frequency of 1/1.001 is also supported.
[2] The XDS service is not supported
[3] Window Style
    Only justify LEFT is supported.
    Only print direction LEFT-TO-RIGHT is supported.
    Only scroll direction BOTTOM-TO-TOP is supported.
    Word wrap is not supported.
    Only the display effect SNAP is supported.
    Fill color is not supported.
    Fill opacity is not supported.
    Border type is not supported.
[4] Pen Style
    Pen size SMALL is supported.
    Font style is 0
    Only offset NORMAL is supported.
    Italics is supported.
    Underline is supported.
    Only edge type UNIFORM is supported.
    Foreground colors: white, blue, green, yellow, cyan, red, gray, and magenta are supported.
    Foreground opacity is not supported.
    Background colors: black and orange (orange is displayed when any color other than black is specified) are supported.
    Background opacity: only black (semi-transparent) is supported.

**<Note>**
• 3G-SDI signals are not supported.

# Utility Software (Support Coming Soon)

■ **User customization function**

Utility software that supports this function is available from the Panasonic website. For details, see the Panasonic website (http://pro-av.panasonic.net). This software allows you to write to the user areas in FilmGamma and ColorSpace and perform calibration adjustments.

● **FilmGamma upload**

When the unit settings are set as follows, user defined values will be set.

The underlined values are the factory defaults.

| Submenu | Setting | Description |
|---|---|---|
| GAMMA SELECT | FILM | Selects the gamma curve.<br>[FILM] Film mode<br>• When [FILM] is selected, the FILM mark is displayed for the operating status. |
| FILM GAMMA | VARICAM<br>OTHER<br>USER1-3 | Selects the FILM gamma mode type.<br>[VARICAM] For VARICAM use          [OTHER]     For other cameras<br>[USER1/USER2/USER3] User download items |

Three user defined values can be registered as shown below.
To register user defined values, use the FilmGammaSoftware utility software.

RS-232C

For how to install and operate the software, refer to the operating instructions of the software.

● **LUT upload**

User defined values can be set when setting the following settings.

| Submenu | Setting | Description |
|---|---|---|
| LUT | USER1-3 | Reproduces colors in accordance with the set COLOR SPACE using the 3D LUT (look up table).<br>[USER1/USER2/USER3] Allows you to select a user setting value. |

Three user defined values can be registered as shown below.
To register user defined values, use the LUTSoftware utility software.

RS-232C

For how to install and operate the software, refer to the operating instructions of the software.

● **Calibration adjustments**

The unit can be calibrated by directly connecting an analyzer (CA-310) and via a PC for managing calibration data.
For how to calibrate the unit by directly connecting an analyzer (CA-310), refer to "CALIBRATION" (→ page 35).
The following describes how to calibrate the unit via a PC.

BT-4LH310P/
BT-4LH310E

RS-232C

USB
(Supported analyzers)
Konica Minolta:         CA-210/CA-310 Display Color Analyzer
X-Rite:                       i1 Pro Standard Measurement Probe
PHOTO RESEARCH:  PR-655

For how to install and operate the software, refer to the operating instructions of the software.

| Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households) |
|---|

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product.

Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

**For business users in the European Union**

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

**Information on Disposal in other Countries outside the European Union**

This symbol is only valid in the European Union.

If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.

## ENGLISH

■**How to open the operating instruction manual PDF files**

Discontinue installation if the installation screen of the software opens as a result of inserting the CD-ROM.

When [INDEX.pdf] on the CD-ROM is opened, a list of the operating instruction manuals will be displayed.

Click on the document name of the manual to be opened.

■**Adobe® Reader® is required to read PDF files.**
**It can be downloaded from the home page of Adobe Systems.**

## DEUTSCH

■**Öffnen der PDF-Dateien der Bedienungsanleitung**

Brechen Sie die Installation ab, falls beim Einlegen der CD-ROM der Installationsbildschirm der Software erscheint.

Wenn [INDEX.pdf] auf der CD-ROM geöffnet wird, erscheint eine Liste der Bedienungsanleitungen.

Klicken Sie auf den Dokumentennamen der zu öffnenden Anleitung.

■**Zum Lesen der PDF-Dateien benötigen Sie Adobe® Reader®.**
**Dieses Programm kann von der Homepage von Adobe Systems heruntergeladen werden.**

## FRANÇAIS

■**Comment ouvrir les fichiers PDF des manuels du mode d'emploi**

Arrêter l'installation si l'écran d'installation du logiciel s'ouvre quand le CD-ROM est inséré.

Quand [INDEX.pdf] sur le CD-ROM s'ouvre, la liste des manuels du mode d'emploi s'affiche.

Cliquer sur le nom du document correspondant au manuel à consulter.

■**Adobe® Reader® est nécessaire pour lire les fichiers PDF.**
**Ce logiciel peut être téléchargé depuis la page d'accueil d'Adobe Systems.**

## ITALIANO

■**Come aprire i file dei manuali di istruzioni per l'uso**

Se inserendo il CD-ROM si apre la schermata di installazione del software, interrompere l'installazione.

Aprendo [INDEX.pdf] sul CD-ROM, viene visualizzato un elenco di manuali di istruzioni per l'uso.

Fare clic sul nome del documento corrispondente al manuale da aprire.

■**Per leggere i file PDF è necessario Adobe® Reader®.**
**Il programma può essere scaricato dal sito Web di Adobe Systems.**

## ESPAÑOL

■**Modo de abrir los archivos PDF que contienen el manual de las instrucciones de funcionamiento**

Interrumpa la instalacion si la pantalla de instalacion del software se abre como resultado de insertar el CD-ROM.

Cuando se abra [INDEX.pdf] en el CD-ROM se visualizara una lista de los manuales de instrucciones de funcionamiento.

Haga clic en el nombre de documento del manual que va a abrir.

■**Para leer los archivos PDF se necesita el programa Adobe® Reader®.**
**Este programa se puede descargar de la pagina inicial de Adobe Systems.**
